

DAWN OF A NEW AGE.....

Man has progressed technologically, yet he is still starving, unable to cope with the elements. He has evolved intellectually, yet still cannot communicate with his neighbor or control his emotions. At this crucial point in human history, man has the power to create the utopia of utopias or destroy himself in a temper tantrum. He needs new understanding at this time, something which frees him from his struggle with good and evil, offers realizable hope in his search for absolute love, and answers many New Age questions dealing with ESP, psychic phenomena, etc.

The Unified Family would like to share with you a comprehensive vision of all aspects of human and non-human existence, using a powerful new understanding that underlies Judeo-Christian and Eastern religions and philosophies and integrates all fields of specialization, such as physical sciences, social sciences, history, philosophy, and religion.

This cosmic vision is the product of the search of a contemporary Korean sage, Sun Myung Moon, who teaches that mankind is entering a New Age. Revelatory and other phenomenal evidence will be cited as to the beginning of the New Age which is revolutionizing relationships between God & man, man & his environment, individuals, families, societies, and nations.

This philosophy can be applied to diverse human problems such as love and interpersonal morality, the origin of war and its elimination, and the relevance of contemporary education to the individual.
