

The Unified Family is changing and re-ordering the lifestyle of America in a dynamic way.

We are shaking the foundations of the materialistic values that America holds so dear.

In fact, we are creating a spiritual revolution! The Unified Family will turn America upside down. We are working to build a society of and for true men and women, upon a foundation of truth; and to destroy the falseness of our society right down to the roots. Mediocrity, superficiality, dishonesty, and soft-headed apathy will be driven out of our lives; this false standard of value will be replaced by brotherhood, integrity, honesty, creativity, truth and love.

The Unified Family is presenting to America a lifestyle based upon these values. It is being established in many major American cities. Our way of life expresses true human concern; it is a concern that parallels God and His boundless caring for humanity.

We are concerned about the people of Southeast Asia and for the struggling and starving people the world over. More relative to our life in America, we are presenting a realistic, workable solution to the death of human awareness and sensitivity that has swept our nation. We will fill the spiritual vacuum currently felt in our automated concrete world. We consider America, with her abundant resources and advanced technology, to be a country capable of helping the world; yet Americans appear to be profoundly unaware of this destiny.

The Unified Family is creating a dynamic alternative to a struggling world. We are presenting lectures and discussions on the true ideal world, demonstrating real brotherhood. We are anticipating your attendance.
