

Marriage and family in America is in serious trouble - We have to fix it!

Marriage and family in America is in deep serious problem!

I sent a letter to Unification Church president, Demian Dunkley, stating my concerns about America's future with its alarming rate of 55% divorce and family breakdown, that neither government nor Christian ministers could turn the tide.

This issue really remained unsolved and may go worst unless some people do something about it. Could you imagine, every six out of 10 children you see are raised without a mom or dad. Divorced parents never want to marry again and children from divorced parents most of them don't want marriage. Imagine what would be the result of this 50 years from now. Who can save America and future world from this epidemic? I believe only the FFWPU- (Family Federation For World Peace and Unification) can do it. Find out why...

We need to go bold and strong! We need to visit every civic and religious leaders and turn this country upside down!!! We should visit every church, Synagogue, mosque. Every governor, mayor, police station, fire department and speak about this serious issue.
