

# God Reveals His Heart - Seminar about the Divine Principle

Regensburg, Germany, 26. October 2013

When we held a seminar about the Divine Principle with Dieter Schmidt as lecturer in Munich on July 13th and all participants were very excited, our sister Brigitte Beer developed the desire to hold such a seminar also in Regensburg. The heart of God should be revealed through the Divine Principle also to her guests and friends there. Desire, plan, preparation and also realization!

Finally 38 people came together in the training center of the Deutsche Bahn (German Railway) in Regensburg on 26. October and listened carefully to the DP lectures of Dieter. The participants came from all over south and east Bavaria and were a colorful mixture of all age groups and generations.

The workshop was moderated by Annette Bentele and musically accompanied by Oivind Haugen who had already helped a lot with the preparations.

At first the day began with a would-be worst case situation! The beamer didn't work and the planned DP slides didn't appear on the screen. What firstly appeared to be a disaster turned out to be a foreordination of God, according to the opinion of all. By guidance of the Holy Spirit Dieter could freely speak out and lecture the DP and all participants could concentrate undivided on his words.

He taught about the characteristics of God, his ideal, the fall of man and especially emphasized the mission of Jesus what moved the listeners very

much. Very clear was also the Principle of restoration up until to the meaning of our movement. That means all the way back to God.

At lunch time we walked for about 10 minutes to a nearby restaurant, where we

could strengthen ourselves physically and continuously shared about the lectures we just had heard. Also the fresh air and moving around was a good recreation.

One guest expressed, the more he would deal with spiritual matters the more liberated his mind and thinking would get. It wasn't difficult at all for him to concentrate on lectures a whole day long, the contents would be too important and the way of lecturing was so vividly that there was no way to get spaced out.
