

# 1 Day Divine Principle Seminar

Bucharest, Romania, 17. May 2014

Greetings from Romania, First we would like to express our heart of appreciation for having been able to organize this Saturday's One day Divine Principle Workshop.

We feel that Heavenly Parents are revealing to us with each occasion about how precious it is to share with others this heavenly truth and we hope to always inspire our brothers and sisters about the value of our life, the beauty of family and the unique power of love. Because there weren't so many participants we felt that we could create an open-

hearted family atmosphere, that we could easily accept each other without preconceptions.

The Divine Principle Introduction and the Principle of Creation lectures were presented by the STF team leader Nicole Thurner, with a very heartistic and enthusiastic approach; the lecture about the Human Fall- The Root of sin was offered with pure heart by our Swiss brother Kenichi Komagata and the solution for our internal-external struggles, namely the Introduction into the Principles of Restoration was presented by the SES team-leader Florin Adam. We all felt throughout the lectures that in our lives we need to talk about God's heart and situation more sincerely in order to also understand ourselves better, in order to see things from a higher perspective and make the right decisions for the future. Past-present-future moments are strongly connected and we cannot be ignorant about this reality. Even so, the past we must leave in the past and with the future still unexpected, we must focus on the present.

After the lectures we ate lunch together and shared about both personal experiences and the activities that we are preparing for this summer. With our physical batteries charged we continued with Happy Day and with the honest hope that we can make a truly pleasant, quality time together.

Thank you so much beloved Heavenly Parents,

We hope to offer all your blessings to our brothers and sisters! Aju.
