

## We are Endowed with Emotional Sensitivity to God's Heart

Julian Marianov  
2017

*"Human beings are endowed with emotional sensitivity to the Heart of God... so that after his perfection, he could breathe God's love perfectly..."*  
- Divine Principle p. 80

As I explained in another article ([HOW TO STUDY THE SPIRIT WORLD](#)), in 1985 Dr. Moon instructed elite scientists to study the resonance of spiritually gifted people. "If we delve into this area," he explained, "a world of new dimensions will be found." "Research on the frequency" will "enable contact with the spirit world."

### Quantum Studies on Frequency

Everything is frequency... all in existence. We are living in a universe pulsing in advance harmonics of vibrations. Each of your physical senses exist, because everything in the universe is vibrating. Physical senses are reading the vibrations and giving us sensory perception of the vibrations. But there are many other levels of frequency beyond our sensory perceptions. Science today is studying them.

Now is documented that there is an intelligent field of energy that underlies our physical reality. Doesn't work like electricity, so we didn't have the equipment to measure it. As Rev. Moon explained:

"The motions in the spirit world are all made up of vibrations. I instructed them to research this... existence of the spirit world can be scientifically proven. This can be done by discovering the frequency of vibrations used by spiritualists when they contact the spirit world." [Rev. Moon's Instructions](#)

Only in the early 2000 we had wide spread access to the technology to measure these high frequencies and this could only get accepted in the scientific world in the last few years. So we are only arriving at what Rev. Moon predicted, "If we delve into this area, a world of new dimensions will be found" and we will "enter the age where the unknown spirit world can be rationally understood" through this new quantum research.

### The Field of Electromagnetic Frequency

These new studies are showing that the world is made of electro-magnetic fields. But they reveal that the human heart is the strongest biological generator of magnetic fields and electric fields in the human body.

There is no question within the scientific world any more, it's a fact that we effect our reality. The question is how much, to what extend we are able to effect it and is it in positive or negative way. But you should understand, whatever is in our hearts, will project in the world around us.

Our hearts produce 5000 times stronger electromagnetic field, then our brain. This field is a quantum mirror were the template of our thoughts, feelings, emotions, believes are projected. Everything that we experience through our hearts.

As we know from the Unification Thought, our Heart is the essence and the center of [our Spirit Mind](#), where God dwells:

"God is at the center of your heart... God is the root of love... we cannot feel Him... because He and we are one. He is one with love... to manifest God, you have to spread your love in all four directions." CSG Book 1. God p.28

To understand how important it is to live our lives in love, please have in mind this; We create (generate) feelings (they are patterns) in our hearts and they extend over a mile around our bodies. The amazing part is, that the quantum stuff, that universe is made of, crystallizes around this blueprint (template) to become the relationships, the career, the success or the failure, joy or suffering in our lives. Meaning, what projects from our hearts will become our reality.

Note: HEART RESONANCE shows clearly what's GOOD OR EVIL... and it can be measured. Our thoughts, feelings and actions produce energetic field, that becomes part of us. This Aura can be photographed and the character and the spiritual level of the person becomes visible. That's why on subconscious level and spiritually we cannot hide our past life and identity. Read, [HEART RESONANCE OF CIG](#)

## What we Project in our Environment

Yes, there is a field out there connecting everything and the projection from our hearts effects those around us. It effects not only our family, relatives, but the whole neighborhood and the whole town. When our thoughts and feelings extend further in our prayers, meditation or thoughts, we influence positively or negatively the whole world. We are powerful creators; In the quantum physics you see that if we believe we are passive observers, that's what we are. If we believe we are powerful creators, we become such. It's determined of what it is that we accept, what are our believes of the world:

"If we believe that we are powerless victims, things will seem to happen to us and we will see ourselves as victim. If we understand that we are one with the universe, we can be powerful creators. It's all in our judgments." [Quantum Sensitivity](#)

Satellites measured enormous picks of electromagnetic energy after 9/11 extending far above the surface of the Earth. Experiments were made, when the prayer of few affected towns and cities, to the point that for a period of time the crime stopped, incidents dissipated, illnesses were gone. Until eventually the projection from the more negative people again took over.

## Resonate with God's Love

Our hearts tune to different resonance, in the same way a radio tunes into the various stations. Tuning our heart frequency to lower (selfish) or higher (unselfish) resonance will change our spiritual and physical state and health. As Rev. Moon says:

"Make yourself a tuning fork, resonating with and vibrating along God's frequency. Resonate with God's unselfishness." - Father [On Spiritual Help](#)

The Heart is expressed through the Intellect, Emotions and Will and they generate energy into the spiritual realm and the physical realm. This resonance automatically influences the way we think, feel and function. The main purpose of our physical life is to develop our ability to love and live for others. Now even science can measure [the level of our heart resonance](#) and thus show the level of our spiritual growth and the spiritual principles, that were invisible so far.

The chart of heart resonance clearly shows, how we grow from the resonance of children's heart, through the growth stage, to enter in the realm of love, joy and peace, thus finally reaching to God's Heart. And as Rev. Moon explained, "The motions in the spirit world are all made up of vibrations.", so if we are not developed in our hearts, we will suffer, unable to breath the love of God. Read, [Age of the Union of the Spiritual and the Physical Worlds](#)

"The sensibility of our spirit man is to be cultivated... during physical life on earth... Only when a person reaches perfection and is totally immersed in the love of God while on earth can he fully delight in the love of God as a spirit after his death." DP Creation p.49

## We are all Linked in the Same Conscience

The most difficult time to make change is when everything is settled and OK. But now the whole world is expecting some change, we are all linked in in the same conscience and the foundation for this positive change is already here.

"If we unite our forces together, then we can make a better world, a world of peace." [MODEL FOR THE IDEAL PEACEFUL WORLD](#)

Study shows, that to make that lip are needed insignificantly small number of people - just one percent of the population. More than 30 nations are chosen for that change towards the Culture of Heart. In South Korea, amazing community is forming around Chung Pyung Lake's Peace Palace.

There you see a new pure, happy and creative culture rising among the thousands of young children living and studying in this peace complex. And this is only a glimpse into what's coming in the near future, when big communities of few generations start appearing everywhere around the world. In many nations already whole villages and towns are being educated together with their leaders, kings, ministers. [Read more...](#)

"We will consequently establish a world based on the unified culture of heart... a world without war or conflict... God's Kingdom on earth and in heaven will be realized." Sun Myung Moon, CSG p. 1534

In the last 17 years we have developed a vast and very deep research on [Unification Family Therapy](#) (UFT) which in its essence is a Heart Resonance Therapy (HRT). It helped many struggling couples to see beyond, get out and get free and full of enthusiasm. Try! Invite us for a workshop or just few lectures.
