

“Since you were born as an eternal being, you pass on to the spirit world after this life. You will make an amazing leap in one second. The spirit world is a dimension different from this limited earthly world. You cannot move freely within restricted confines. The spirit world is a higher-dimensional place, so you can do anything there.”

—Sun Myung Moon

In this quote, Father Moon shares the very heart of his revelation that human beings, whether or not they can grasp this reality, originate as eternal beings. Resembling God, humans are designed foremost to exist as beings of true love. In fact, Father Moon offers a wonderful summary statement of these astonishing truths:

True love is living and investing for the sake of others, and forgetting one’s investment. Eternal life can be found here.

The author has been studying and writing about the spirit world for the past 30 years, and his wife Carol continues to work as a spiritual counselor for a New Jersey Hospice.
