

In Finland the people are very prepared and interested in religion

Dear Mr. [Young Hwi] Kim,

This month has been a special month for the Finnish family, as three of our members could share the training-courses in the German team. I myself spent half of the month in the team, too, and will stay until the European conference in July.

This time we can spend in Germany is very useful for bringing up our young Finnish members. They take part in especially established English lectures for Principles and are going to the street together with the team-members. So they get a higher consciousness of their mission, more courage to speak to people and are also trained in all practical things of daily life.

In the meanwhile those who stayed at home in Finland found some new sisters who accepted the Principles.

One thousand of the first chapter have been printed in the printing shop in Germany and so we are now equipped with enough material when we go back to Finland.

We are using this time in Germany to learn much and to be more efficient in our country. The people there are very prepared and interested in religion so that they come easily to the center to listen to the principles.

We are decided to go on quickly with our work to be extremely successful for our Father.

Please give all our love and greetings to Father, Mother, the children, Mrs. [Won Pok] Choi and all the family.

In the Name of our True Parents,

Ellen Kocher
