I. Introduction to Peace Road project.

“An International Highway Connecting the World through Peace.”

Peace Road project was proposed at the International Conference on the Unity of the Sciences on November 10, 1981 in Seoul, South Korea by the late Rev. Dr. Sun Myung Moon and Dr. Hak Ja Han Moon who advocated the International Peace Highway Project. Through the project the world can be connected as one and the walls between races, cultures, religions, and nations can be broken down. So, that a peaceful global village with the entire humanity as one great family can be constructed to actually unite the world as one by building a highway connecting the separated continents first and able to exchange and cooperate with one another more freely and quickly. The world will become one peaceful community.

Since then research to build an undersea tunnel between Korea and Japan, as well as the Bering Strait Project to connect Russia and North American, began. The planning for the Peace Highway which could tie the entire world together has led to greater efforts to achieve an era of true global peace.

— World Peace.
