

## Turning Despondent Moments into a Time of Resurrection and Blessings

Cosmas Obi Okuk

December 2, 2020

Peaceful Families Organization (PEAFASSO) of Refugees from Cameroon in Nigeria

"I sincerely hope that those gathered here fulfill their responsibilities, so that God no longer needs to follow a difficult path. May you become loyal patriots, filial sons and daughters with true love, who can bring joy and happiness back to God."

Hak Ja Han Moon. Nov 2019

In a fight each opponent attacks. The life and misery of a refugee world has attacking devices everywhere and every time. Now we have been confronted with famine and many other hardships, but the PEACEFUL FAMILIES ORGANIZATION is turning these despondent moments into a time of resurrection and blessings soaked in greater determination to move forward in establishing a world of lasting peace.

Though a dream for many who had died to see a world of lasting peace, human history is witnessing a unique dispensation with the surest and truest methodology put in place by the couple of Rev. Dr. Sun Myung Moon and wife, Dr. Hak Ja Han. Upon this foundation, we organized a workshop on leadership skills as refugees to prepare some determined persons who would want to champion the course for the realization of world peace.

It is very necessary to dream big. Realizing Cheon Il Guk needs very big hearts, strong determination and the experience of the greatest eruption of the power of Heavenly Parents in each of us, in each of our couples, in each of our families. The environment, circumstances and number people matters but could be changed latter. Even when we appear miserable, in an uncomfortable surrounding and in a number this few, we embraced a huge dream and aspiration no one may take serious.

We held a very powerful workshop on this theme: World Peace Leadership Training for 3 days. We treated the Divine principle in the first day, exploring the possibilities in applying these principles as way

of leadership. In the second day we treated True Parents approach into the realization of world peace, over viewing their works for the settlement and expansion of their heavenly vision and mission. In the third day we treated, Our way forward into realizing world Peace, where we have to seek for the immersion of the same vision, mission and methodology Rev. Dr. Sun Myung Moon and Dr. Hak Ja Han had, into us, our couples and families.

Heavenly Parents specially intervened, taught and guided the activities of this workshop. It was exceptionally wonderful and beautiful. Many testimonies especially how we could leave far distances to attend this workshop, in the midst of starvation. Those who were sick received exceptional strength and recovery. Some had spiritual encounters with many of the ancestors who attended all the 3 days and how they became enlightened and determined to carry this heavenly mission forward.

These few participants discovered valuable potentials in them to arise and manifest the potentials of God in them. The catechist received more spiritual assignments by saints to go extra miles into this vision. The mother, a Pastor received more empowerment to develop her World Peace Restoration Ministries. The young man received special spiritual assignment to work for world peace. The old papa had great relief in his health.

How beautiful it is to find a people who in desperation show an exquisite determination to carry on the True parent vision?

We resolved at increasing public education through seminars and rallies towards the blessing of more couples.

Even though we know all what we did was not enough, we still express our gratitude to our Heavenly parents, True Parents of heaven, earth and humankind. We thank all our heavenly partners and all of you out there.
