Victory Celebration for all the Events Commemorating the 7th Anniversary of Holy Ascension of True Father

Hyojeong International Culture Center

At the Leaders' Assembly yesterday, I saw leaders who confidently expressed their resolve to boldly push ahead in realizing Vision 2020.

Vision 2020! Has the victory you promised to Heaven and True Father become your victory? Good!

Originally, God, the Creator, made the universe in His image. He created a man and woman, Adam and Eve. He then gave them a growth period in which they were to become one with God through their absolute faith, absolute love, and absolute obedience. They were to grow and attain perfection in complete unity with Heavenly Parent and emerge as humankind's true ancestors.

Yet, this did not happen due to their mistake. I say this repeatedly because we are now in the era of completing the providence. According to the Principle of Creation, the Creator, Heavenly Parent, must reveal Himself. Until now, this could not happen. We must fill in where it is lacking.

The second part of the Divine Principle should show that the True Parents, the victorious human ancestors, must absolutely emerge to realize Heavenly Parent's dream and humanity's wish, instead of focusing theoretically on the returning Lord, the Second Advent. In other words, the Divine Principle must be able to speak about the [actual] True Parents.

We now have only a few months left until Vision 2020, the day we promised -- in Heaven's presence -- to realize. Afterward, I will work to establish the foundation for the eternal Cheon Il Guk. I will reorganize and support all areas connected to building that future. 2028 will mark the 60th anniversary of True God's Day (Heavenly Parent's Day). If the Christian foundation had served as an environment for True Parents once they emerged, True Parents' Holy Wedding and Heavenly Parent's emergence would have occurred on the same day. However, because no one established that environment, True Parents emerged in 1960, and, only later in 1968, did we establish God's Day.

This was a time of deep remorse for us, particularly in front of Heaven. Soon, on the foundation of having successfully realized Vision 2020 as we advance toward the 60th anniversary of True God's Day, you will see miracles demonstrating that Heavenly Parent is with True Mother, God's Only Begotten Daughter, as she works on Earth for Cheon Il Guk.

It took a long time for you to get over your stereotypes. When I spoke about Africa as the frontline of the providence, many people recommended I refrain from doing that, saying Africa lacked a prepared environment. In the end, you have witnessed that wherever God's Only Begotten Daughter, True Mother, goes, Heavenly Parent goes with her.

Caring for Christians

While I am still on Earth, I have much work to do. Throughout their history, Christians have been unable to comprehend God's and Jesus' essence. We must teach Christians so their hard work does not go in vain. Being the True Parents, we have opened a way for them to go to God as His true children. Isn't that right? There is hope if they believe in True Parents, accept True Parents, and become families who have received the Marriage Blessing. Heaven conducted the providence for 6000 biblical years to see this one day, and many righteous people around the world are working hard for God. I would like to find these righteous people and give them the chance to fulfill their responsibilities in relation to completing God's providence.

Structure for Earthly Heaven

By 2020, I would like to see some substantial developments and the five [governing] branches of Cheon Il Guk in full operation. Meanwhile, as I have said before, I will also be on the frontline managing the work and efforts required to achieve global restoration by 2028. To do that, I will combine the Cheon Jeong Won (administrative branch) and Cheon Jae Won (financial branch) into one branch, and the Cheon Bo providence (Cheon Bo Won) as the other branch. The Cheon Bo Training Center, as well as the café

and its educational centers, will be under the Cheon Bo Won, I have upgraded them to one of the five branches of Cheon Il Guk. The Cheon Bo Won (the Cheon Il Guk judicial branch) will continue to operate, though it still needs augmentation in various areas, which I will continue to improve. As for the Cheon Eui Won (the Cheon Il Guk legislative branch), Family Federation for World Peace and Unification (FFWPU) is working well with Universal Peace Federation (UPF) in each region and will continue to manage with the current people in charge.

Securing a Good Future

I will establish my grandchildren, and directly guide and teach them to be central figures. Just as Heavenly Parent -- the owner of the universe -- is the one and only Heavenly Parent, True Parents are also the only True Parents for eternity. As I said, I must remain in good health until my grandchildren, whom I am teaching and raising, become 40-years-old. When I walked onstage at the Seonghwa Festival, two of my grandchildren were on either side helping me. Wasn't that nice to see? I will give them the time necessary to grow into perfected, mature men, as well as to build mature families. I will also ensure that they have many diverse experiences.

Increasing Effectiveness

Recently, I encouraged some high school students to attend Sun Moon University. Even the world-famous Harvard University began as a theological seminary. Sun Moon University's Department of Theology is not as strong as it can be. This is why I will extensively develop it further by making the Department of Theology into an academy that builds public leaders. What should we rename Sun Moon University? The Cheon Il Guk National University! I will turn it into a global university to which all second- and third-generation Unificationists around the world will want to attend.

Right after Father's ascension, the first thing I focused on was raising talented young people. As you know, I sold True Father's helicopter to create the Wonmo Pyeongae Scholarship. As a result, I am able to help educate many second-generation Unificationists. I will directly manage the system to ensure they receive a thorough education from now on. Those who graduate from the Department of Theology will get the Cheon Il Guk certificate [literally, "the Cheon Il Guk seal."] Wouldn't that be an honor? I will ensure that Sun Moon becomes a university to which all parents, from generation to generation, will want to send their children. In order to do that, a committee will be established to promote Sun Moon

University's development and I will oversee every step of its management and operation.

Future Central Figures

I will proclaim worldwide that I am looking for spouses for my two grandsons, Shin-Chul and Shin-Heung, and will accept recommendations. I am looking for precious granddaughters-in-law who will attend, as well as develop, the future central figures of Cheon Il Guk. Those who are confident they know just the right person, please recommend her to me. Their engagement ceremony will be held in 2020 and their wedding in 2023.

Please prepare and wait with a heart of gratitude for the day God can trust and love us. I mentioned that I will make the Cheon Bo Won one of the five branches of Cheon Il Guk. I should add that the director of the Cheon Bo Won will come from the True Family. Do you understand?

To True Parents, the world's 7.6 billion people are our children. The ones I assign as leaders should throw away their self-centered selves and deepen their unity with God's Only Begotten Daughter, the True Mother. Only in doing that will you succeed.

You are all now under one system. I would like you to take great interest in how True Parents' established foundation works, especially in how it serves the world
