

True Parents' Special Banquet with the Hyo Jeong Character Education Materials Committee

Cheon Jeong Gung, 27. May 2017

We must be different from others. We need to create educational materials, not character education materials based on existing thoughts or philosophies but ones with God at their core, character education material that teaches about True Parents. All living things that God created move in accordance with the laws of nature. However, due to the Fall, human beings, who were created at the same time, live in this complicated world today—a world unable to unite due to confusion, wars, and conflict. This influences our children and they are unable to live according to the principles and purpose of God's creation. They must discover this. They must discover this through True Parents. The heads of all religions are all male. Therefore, religions cannot be complete. God's creation is embodied by True Parents.... The True Parents! That is why the role of a mother is very important in the fallen world. We must begin education in the mother's womb. We have to create that environment. Think about nature. How do migrating birds know the seasons? Moreover, how does a butterfly that is less than 3 cm wide fly from Canada to Mexico to prepare for winter? Isn't that amazing? The natural world does

not have to be taught; only humans have to be taught! This is why, when you create educational materials, you must shed light on our true essence, human beings' original nature. I am not telling you to take out everything about existing thoughts or philosophies, but that is not the main subject. We must be different. We must not compromise our materials with the reality of today's world. It is the True Parents! Heavenly Parent! We cannot achieve Heavenly Parent's dream without knowing True Parents. Through True Parents, all humankind must move toward a world in which Heavenly Parents' dream becomes reality, a united world centered on God. We must create that kind of environment, one in which we can educate from the womb. Cultural activities are important for this process. Through things like music or meditation, we must guide people in a good direction, to find their original nature. This is something that can certainly be done through the schools. We are not one religion. We are the True Parents, the embodiment of the principle and purpose of creation! You have this truth; it is a precious gem! Do not compromise with the fallen world! We must set the standards.
