

## Deepening of the Divine Principle

One day workshop for 18+ youth members

Madrid, Spain, 26. October 2013

**O**n October 26 was held in the center of the church in Madrid the first meeting of a project that the Youth Committee wants to develop at the local level.

Due to the small or none presence of spiritual activities or ws at local level for youth members over 18 years old, the youth committee has decided to develop every 2 months a day dedicated to the study of the Divine Principle. This is not gonna be just teaching the D.P. but trying to explain certain themes or points relating them to personal life experiences or personal understanding of the book.

This ws will take place (from the next meeting) in the Manantial, on the last Saturday of the month; we thought that Manantial is a really good place to do this kind of things and besides, on this way all those who wanna stay there can participate the next day to the Sunday Service that usually is held there.

This first meeting was held in the center of the church and there were 11participants and 4 speakers.

The meeting began at 10.30 with a brief explanation of the project and an introduction by the national leader, Maryvonne Jamois , about the importance of following in the footsteps of True Parents and the importance to grow and develop ourselves as second generation.

Then the word was passed to David Pique who has faced one of the first chapter's themes: God. David, referring also to parts of the CSG, explained the various characteristics of God and how these are manifested in our lives.

After a break a new lecture started and Carlos Badosa explained his point of view about another theme: the Four Position Foundation. Carlos explained that we should valuate everything that surrounds us and how the four positions foundation can be summed up in three key stages: someone-purpose- result.

The last speaker was Armando Lozano, who spoke of the Original Value. The main points touched by Armando were: how to know the value of an object / thing (relationship desire-purpose, subject-object), how to valuate ourselves (the search of value must be connected to the purpose of God's creation), how life should be a search of truth / beauty / goodness.

At the end of the morning, some guys have returned to their homes and others went to the Carp House to eat and spend the afternoon together.

Sincerely, Francesca
