

Transcript of Reading with George Detlefsen and medium 9-10-20

Laurence Baer
September 10, 2020

Medium's prayer:

Heavenly Parent. Thank you so much for this chance to have a meeting between Heaven and Earth. I just am grateful to be used as a channel. Heavenly Parent sometimes I feel not adequate, with not the proper skill set to do this type of reading, but I pray that the proper support will be provided for me so when I'm going into areas that I have no knowledge or understanding of or when I'm trying to penetrate realms that are too high for me to comfortably enter that I am given all the support that I need, and that I can be a clear channel and serve accurately and effectively so that the knowledge and information that comes can be applied in a very practical way and a useful way to help us reach our goals and ultimately Heaven's goals – which we want ours to become more and more in perfect harmony and unity with Heaven's goals. Thank you so much. I ask our angel team to form a shell of protection around us, and let this reading progress for all of our next highest evolution. Thank you so much and I report this I our names as Blessed Central Families, Aju.

Medium:

Well George is definitely here, and he has a very interesting sense of humor. And he's just kind of reassuring me because I sometimes feel inadequate when I'm dealing with really complex issues. I feel specifically very inadequate when I'm asked to get information dealing with science or physics or math because I have no software to download the information. He's letting me know that they've just got to work with what they have available, and right now I'm it. So he's using a little hand baby food grinder, Muriel might know what a Happy Baby grinder is – a little white plastic thing – you put the food in and grind it up for the baby. So he's trying to give me things that I can chew without teeth. He understands that I don't have any scientific understanding, but he says the scientific information is not what is crucial for us to understand. The higher realms are really covering all that. They're working on the logistics and the mechanics of it. We don't have to figure that out. And what they do is – they're identifying people, like the people working in WRIST. Scientific knowledge is increasing day by day, so they try to find people who are spiritually receptive, who have some ability to download this information, and it's a rough business. He's showing me a very antique telephone – like when Alexander Bell made his first model. He was shouting into the phone to somebody in the other room. It's kind of like that. It's still in very primitive stages, but it's advancing every day. As Peter Nordquist said, it is advancing every day. So people like me who are basically illiterate, and have no teeth, they're willing to mush it up for me to the point where I can swallow it and try to pass it on.

There is a lot of excitement in the angel community – funny I never heard of it referred to in this way. I never thought of angels as being a community but I guess they are – there's a lot of excitement in the angel community to be asked to work, to be given specific requests for certain projects. They love working with people who are awake and requesting their help. It's kind of like a little kid asking Daddy to help him with his first grade homework. They do want to help, but if the child refuses to do the homework the parents can force in or drag him to push or pull him. But if the kid is really trying and he asks for help, the parents are very happy to come in and teach him how to do it himself. So there are a great number of angels and they are apparently working in teams. They're working in like individual committees, but they're not separated. It gives me the feeling of an orchestra. In a symphonic orchestra, maybe many different players are playing different instruments, but they're all playing the same score. And when they play their instrument to the best of their ability it makes beautiful melodies and harmonies. So the angels are working in different areas of specialization, but it is all working towards establishing the Kingdom of Heaven on Earth.

Laurence:

I have a lot of questions, and we don't have much time, so I would like to get into those so we can get to as much as possible.

Medium:

OK

Laurence:

First of all, I want to thank George for his continued oversight of our committees and especially this angel project, and I want to apologize to George for my arrogance last conversation when he showed me a gyroscope and I thought that it was irrelevant. Please forgive me.

Also I wanted to let George know that I had a wonderful call with Pat and with Shinghi and Nathanael since our last discussions, and is there any guidance he has regarding a next step for any of them that I should be aware of?

Medium:

He's just saying, "keep it up. Keep the lines of communication flowing. He's showing me a thumbs up. He's very happy that you're talking to them, and he's not saying it in so many words but he's saying – like when you said you were arrogant about the gyroscope, it's almost like he's taking kind of a father position and you're a teenager and he's saying immature people think they have all the answers anyway – but he's saying it with tongue in cheek. Like your 18 year old kid tells you you don't know anything. He used to be a teen too, so he's not offended at all."

Laurence:

Good. So the next question – I want to send an update to our prayer team and the Family Federation leadership. It has now been 46 days since I initiated the project and 33 days since our last conversation, and I have a number of questions. The first is:

How is the launch going? And do they still need more and higher angels to help them, or do they have the angelic support they need and seek?

Medium:

Yes. They were trying to explain to you that they have this massive companies of angels, teams of angels, that they're working together as one unit. And just the intention and the request for the outcome is enough. The angels will recruit each other, but the human intent and invitation, when it's firmly established – earlier this morning they're showing me a door opening. The human intent and request opens the door and the angels are delighted to come. And as the project advances more and more angels have the foundation to join in. And there are many different levels.

Laurence:

Perfect.

Is the prayer team helping, or do we need more people involved in the prayers. Also is there anything else we can do to encourage and motivate the angels, and can you suggest any changes or improvements to the points that we are praying for with respect to this project?

Medium:

Simplify. Less is more. Meaning distill things into 10 basic points. Some of the prayer points have already been completed. Distill it down to 10 points, and keep it simple. Even 8 points if you can. Clear concise and simple, and people are more likely to stick to it. And ??? on the details. Your responsibility is not "how". Your responsibility is to "ask how", and they will show you how, and they will help you meet the right people at the right time and find the right resources and you will be open to get the right dreams. And it's just move forward. Don't focus on getting numbers. You need quality not quantity. If you chat about it with people, what you're doing, and they're interested, invite them. It's more about committed inspired people, and their prayer is kind of like fuel for the spirit world. It's like jet fuel. I see the prayers like cheerleaders – it's like the angels are the football team – and as they hear the people in the stands praying, like cheering them on, it gives them fresh energy to keep going. And then it draws more and more angel power. You don't have to go looking for angels. The angels will find their buddies.

Laurence:

OK.

Can you provide any clarification or update on how this project is impacting the situation on the earth or is it still too early for that?

Medium:

It's never too early. But sometimes when you see a seed – an oak tree starts as an acorn – and a lot of growth is going on before you see the first sprout. So the growth is constant, the growth is evolving, the impact is being felt. I feel like more focus has to be on the unification of North and South Korea. That's really very very central for the advancement of the Kingdom of Heaven. North and South Korea is really where the rubber meets the road. It's really where the showdown between good and evil is happening, and

the future of mankind is hanging in the balance.

Laurence:

OK. Last question on this section:

Is one aspect of this project going to be mobilizing large numbers of unemployed spirit men to stand with True Parents, or is that really not part of the project?

Medium:

Not really. What I'm getting is that people, when they go to the spirit world, they get their mission. There are people who dedicated their lives to working for world peace, and to bringing harmony – especially there are many Christians who prepared their lives to receive Jesus, and they will naturally be given opportunities. As the project grows in strength and power, it's almost like it will gain volume, and people will request to be part of it. What I'm getting is that this project is a bit specialized, and you don't need massive numbers of unskilled people. It's not a heavy construction project where you need brute strength. Right now it needs skilled technicians, and they're there, they've been invited, they've been recruited, they're working. And other specialists will be called in when there are job openings. It's going in stages, and the prayers are almost like want ads, "help wanted".

Laurence:

Got it.

Now I know you didn't want to go too deep in science, but my question is, can you provide any scientific explanation to explain what this spiritual technology is and how it works? And there's two sub questions to that:

1. In the book of Ezekiel it appears that it was used first to punish and judge Israel and other nations, and then later to bring restoration. So I assume that this technology can be used in many different ways depending on what is needed for God's highest purpose.

Medium:

Yes, that is the correct assumption. And they're saying, unfortunately – George is taking out his baby food grinder - he said that by the time I grind it all up you won't recognize what she's able to eat. The impression I got is that the technology that they're revealing is coming to – I'm not going to say that it's premature – but it's coming to us while we're still at a relatively low level of consciousness. So we cannot fully take advantage of it. It's like handing a hand gun to an eight year old. You're trying to teach him how to shoot the gun. Maybe you're explaining gun safety. You have some clay pigeons. You're at the shooting range. And the first time he fires the gun, it knocks him right backwards. So we have to grow into this technology, so they're being very careful not to give us too much, too fast, because we don't have the spiritual maturity yet to handle it. They're trying to qualify and train people to receive this higher consciousness and this ability. They're saying that WRIST is going to have a significant breakthrough fairly soon.

Laurence:

Is there anything specific that I should share with Peter or John Park with respect to this, or is that not appropriate?

Medium:

No, it's going to come to them through other channels.

Laurence:

OK. Good.

Medium:

Just let them know, your job – you're the cheerleaders in the stadium. Your job is to fire up the team, and let them know all their fans are screaming for them, and the players on the field is the spirit world.

Laurence:

So should I let WRIST know that they are going to have a breakthrough soon, or not?

Medium:

Yes, you can. You can tell them to expect it. If they expect it, small things that they might otherwise not pay much attention to, they will be on the alert. How soon is soon? I can't say, but the general level of consciousness worldwide is on the ascendance. It's rising very steadily and more quickly than it has in the past. So things that are not possible today, as early as let's say October could be. Things are opening opening every day.

Laurence:

OK. One last question for George before we change off of that. You know, Joelle has almost got her doctorate in quantum computing. Is she someone that we should encourage to move in this direction, or is that not appropriate for her?

Medium:

She's not ready right now is what I'm getting. But always leave the door open, keep a warm and friendly relationship. Is she one of his daughters?

Laurence:

She's my daughter.

Medium:

Oh. She's your daughter. OK. I felt a fatherly love for her. Just keep the door open.

For some reason I saw George standing with a screwdriver. A flathead screwdriver, like you might buy at the Dollar Tree. It's got a yellow plastic handle. Before you began speaking I saw him holding a simple screwdriver, whatever that might mean. Maybe "don't screw things up".

Muriel:

No, he always fixed things.

Medium:

Just keep her encouraged. She has to kind of find her own path, but let her know that she would always be welcome. But it has to be her decision.

Laurence:

Of course.

OK. A whole new area of questioning here, but relating to the technology still:

Medium, you indicated that this angel technology that we're witnessing is not unique at this time, but in fact it's being replicated with other groups around the world based on their understanding and culture. And I would deeply appreciate having a better understanding of such deployments since it clearly involves a significant and concerted effort with many angels. So to begin with, the first question is:

How many such initiatives focusing on the Earthly plane are currently active in the spirit world right now?

Medium:

(Laughing) – You're not going to like the answer. It's none of your business.

Laurence:

OK.

Medium:

You just have to focus on yours, but there are many.

Laurence:

No problem.

Medium:

What they're showing me, it's like planting seeds. You know the parable in the Bible. Some of the seeds fall on rocky soil, some of the seed is not good. They're planting it all over, and some gets through, some doesn't. And some, the surroundings are not yet ready. But, what I am seeing is that some of the people that are getting this same technology, are going to start connecting. Seemingly haphazardly or randomly, but it's not. It's orchestrated. And when they start to communicate, things will really escalate.

Laurence:

OK. Well that's important.

OK, historically. Let's talk about historically, since what's going on right now may not be my business.

But, other than the description in the book of Ezekiel, which was 2500 years ago, I was unaware of any other such deployment until this project. But that time also corresponded to the approximate times of Buddha, Confucius, Lao Tzu, and it was shortly before Socrates and Mencius. Did each of those revelations and insights involve separate deployments of this spiritual technology?

Medium:

Yes. Because the world was at a point, you know, getting ready for the coming of Jesus, and the fields were being plowed. The earth was being turned over so that the good seed could take root and the world could be ready to receive the Kingdom of Heaven, but as we say, the rest is history.

So we repeated that cycle, and now we're ready. We're ready again, and we will either succeed or fail just like in the past. It's really up to people on earth. And the whole earth doesn't have to understand what's going on, but enough. There's a, what do they call it, you know the "hundredth monkey theory", enough people have to get it, that it can tip the scales, and already good is on the ascendancy, the vibration of the earth is rising very rapidly, and corona is actually helping with that. It's causing a lot of suffering, but it's causing a lot of enlightenment.

Laurence:

Great: So it was happening before Jesus. Was it also deployed at the time of Moses, and at the time of Jesus and also at the time of Mohammed, and other great prophets, or was it only just at the time in preparation for the Messiah?

Medium:

Each time a higher truth is about to be given, there's always preparation on the spiritual level. And it varies. Its custom tailored to the ability of that generation and people. It helps them to receive the new truth, whatever that new truth might be. And now, mankind is on the verge of the possibility of world peace, in the true sense. And so there's the tremendous deployment of resources because conditions have been made on the earth plane and a substantial number of those conditions are directly connected to the True Parents of Heaven and Earth – by the central blessed families.

Because of the conditions that have been made by the central blessed families worldwide, a whole new level of tools can be – oh maybe that's why he had a screwdriver – a whole new type of tool can be revealed.

Laurence:

That's great.

So one last question, before I go to the next section, just to be clear. Was this technology ever used by fallen angels, or is it only something that God has to approve of?

Medium:

Hmm. The fallen angels use every device and tool, and bit of mischief that they can get their hands on, and they are a lot smarter than you guys. They are angels. Angels are like PhDs, and you're like kids in kindergarten. They understand how the universe works very well, and keep in mind they are fallen angels. They're still angels, they still have an intelligence, and yes, they use all kinds of devices. But when you can get your hands on that technology, their tricks and their deceits will be far less effective because

you'll be able to recognize them and disable them very easily.

Laurence:

So that's interesting. I thought that everyone in the spirit world has already become an absolute good spirit. But what I hear you saying is that there's still angels in the spirit world that are not absolutely good spirits.

Medium:

Yes, it's still in the process of evolution. There's still – just look around the world. There's evil everywhere. Who do you think is inspiring it?

Laurence:

OK. Got it, got it.

OK. Next question. And this is regarding this technology deployment.

There are blessed couples around the world, fervently praying for the success of Heavenly Parent's and True Parents' providence. Should they pray for the launch of independent deployments of this technology in each nation, or even in each city, or would it be better for members around the world to focus on this particular deployment or some other particular deployment in order to achieve the maximum benefit for the providence?

Medium:

It's not necessary. You know, you have to understand that the levels of understanding of our central blessed families is widely variable. It's enough if they pray for God's providence to advance, and then that gives God carte blanche. They don't have to be too specific, because God has a master plan. And thus "the prayers of the faithful availeth much". So as people are praying for the success of God's providence, they leave the details up to Him. And one great way to conclude your prayer, you ask for A, B, C, D, E, F, G, or something better.

Laurence:

Alright. Gotcha.

Medium:

Because maybe ABCDEFG are not on God's list, yet. Maybe he needs HIJK first,

Laurence:

Alright, Gotcha.

Well those are my questions. Well actually there's one more if they're willing to answer it. And again, since this isn't dealing with current, but prior to the last hundred years, I'd be very curious, approximately how many times was this technology deployed since the time of Moses.

Medium:

What I'm getting is, you're asking the wrong question. You think in little boxes. You think in numbers, and the spirit world is very numerical, but not in the same way that you understand numbers. This technology has been in existence in the higher realms forever, but they can only deploy it based on the ability of the earth plane to receive it. So, it's almost like, you can send a computer to a place that has no electricity, and the computer won't work because there's no place to plug it in. There's nothing wrong with the computer, but it needs an energy source. So the technology has been there forever, and it's been revealed in bits and pieces. And at certain times, there are openings for more to come. But right now, mankind is at a higher level of evolution than ever, so much more can be given at this time that has ever been given before. Does that make sense?

(.... This section omitted - it dealt with a Baer family question.)

Laurence:

That's great. Alright well, fabulous. If you have two more minutes or three more minutes, I'd love to hear from Rabbi Gamaliel, who has been actively involved with the angels to hear if there's anything that he

wants to share about this. About his experience and what's going on.

Medium:

I just see this man. He shows – I don't know if this is how he dressed. But he's showing himself to me so I can be very certain this is a rabbi. He has side curls, he has the little stove pipe hat on. And he's just grinning. He's got this radiant smile. And he has a team of other wise men who are poring over these scrolls. And he just wants you to know that he is busy, he is doing his part, and his team is very active and very excited, and they're very involved, but what they're doing it's like – he's funny he's saying this is grown up stuff, children can't understand this.

Laurence

Laughing. There you go.

OK well, I'm so glad to have a few grownups in the room. That's wonderful.

Medium:

Laughing.

I guess on the earth plane – understanding is very clear to them, and it's just too painstaking and we don't have the software to understand and download the information that's obvious to them. Like, why does the sun shine? Well, we know it shines. But when you try to scientifically explain how the sun gets its light, it's too much. He said this is – but he's very happy, he's just smiling like a kid on Christmas. That's a funny reference for a rabbi. But you know, he's just beaming.

And the angels are circled around the table, and he's right on the edge there. He's not getting in their way, but I feel almost like he's being energized by their work. It's like they're kind of like a power source for him. And then I see his team off in a distance and they're all working together feverishly. And there's a lot of excitement and a lot of energy.

(... This section also omitted. Baer family matters)

Laurence:

Well thank you so much, we're past the 30 minutes, and George, thank you so much. This has been very exciting and interesting, and I can clarify what we want to send out to our team so we can continue to support this.

Medium:

George is holding his screwdriver up. And I heard this earlier, but I'll repeat it. He's saying – you know KISS, keep it simple stupid. Just a flathead screwdriver, it's not high technology. Keep it simple. Don't get too much into the details. He's holding his Dollar Store, yellow handled plastic screw driver, saying just keep it simple. Keep it simple.

Laurence:

All right.

Medium:

And for some reason, he's tapping the screwdriver on his hard hat. I don't know if that means think about it, or whatever.

Laurence:

Can you ask George – last question –

Medium:

You can ask George:

Laurence:

When should we schedule the next discussion with you? I don't want to, you know

Medium:

Let the Holy Spirit guide you.

Laurence:

OK.

Medium:

When you feel it, do it.

Laurence:

Alright.

Medium:

You'll get a clear indication. Learn to listen. You have good GPS. "Godly Positioning". You have good GPS. Just trust it. Trust it and follow it. He keeps waving this darn screwdriver. Keep it simple. Keep it simple. Just a flathead screwdriver. Low tech. But you know, when you need a screwdriver, nothing else will really do. A screwdriver is a useful tool. It might be simple, you can buy one for a dollar, but it's a very useful tool that can do a whole lot of things. He's showing himself opening a paint can, and tightening a doorknob. You know, it's good for a lot of things. It's called a universal tool.

Laurence:

Laughing. OK. Tell him to be well, and to be happy, and look forward to talking to him again soon.

Medium:

You tell him directly. He's acknowledging.

Laurence:

OK. Thank you George. God Bless You.

Medium:

I like this guy. He knows my limitations and he knows that I'm very aware of them, so I appreciate the little baby food grinder, so he's letting me know that he's not going to choke me on anything that's too much for me.

Laurence:

There you go. That's wonderful.

Last question, I guess if he's still there. George is it OK if I share, as I did with the earlier ones, can I also share this recording with your sons and with Pat?

Medium:

Absolutely. Absolutely.

Laurence:

Alright. Awesome.

George:

Some of it they won't believe, but don't worry about that. That's OK. - Well let me put it this way. Some will believe more of it than others. It's OK. But – he's saying, Pat gets a lot but they don't.

Laurence:

Alright. Very good. We should probably end with a prayer.

Medium:

Yes, please pray.

Laurence:

OK. Dear Heavenly Father, We're so grateful for this chance to really get further clarification on this exciting and inspiring development in the Providence. I pray so deeply that you can really accept the offering of our sharing together and bless all those in the Spirit World who are working on this – all the angels and the leadership of our ancestral committees, and George who's the senior advisor and helping them. We're so grateful for all of them. I pray you can bless this, and that your hand can guide this effort going forward, Father, and I report all these things in deep gratitude in the names of Laurence and Muriel Baer, a Blessed Central Family, Aju.

Medium:

Aju.
