## **Multimedia Equipment for Albania**

Jack Corley

November 30, 2016

---

Dear Brothers and Sisters,

Many greetings from the European Office.

During our discussions at our recent Regional Leaders' meeting in Madrid, Spain it became clear that Albania, our providential nation in Europe, is very much in need of multimedia equipment for the communities to be more effective in their mission.

Your national headquarters, community offices or blessed families might have some multimedia equipment which could be spared and donated to Albania. Please be aware that the equipment should be in good functional condition and not too old. The Albanian General Affairs responsible brother Mateo gave me the list below of needed items. In case you would like to donate used or even new multimedia equipment to Albania please send it to the European Office at:

Peter Staudinger  
Nassauerstr. 14  
65795 Hattersheim am Main  
Germany

STF brothers and sisters will bring the equipment to Albania at the beginning of next year, therefore it should arrive at the European Office not later than December 20.

Yours sincerely,  
Peter Staudinger

### **Needed Multimedia Equipment**

Video cameras (HD)  
Photo cameras (HD)  
Tripod for cameras and microphones  
Audio mixing boards and cables  
Video mixing boards and cables  
Speakers and cables  
Amplifiers and cables
