Marriage Blessing Movement Support Webinar

“In the Unification Church, we call marriage the “Blessing.” The life of a married person is such that a man and woman who had been alone on their path to seek love abandon that path and stand as complements to each other- comforting each other when they feel lonely, sharing joy together when they feel joy and giving each other strength during difficulties. In this way, one becomes the right foot and the other the left; one becomes the right hand and the other the left. Together they praise God, saying they are moving forward with God’s love superimposed on the theater of their lives.”
