Ref: Tribal Messiah Report from Liberia (West Africa)

The Dennis Family reports the following Tribal Messiah activities from Liberia (West Africa).

- Last April, on behalf of our family I left Los Vegas, NV to started Tribal Messiah work on our Farm in Liberia.
- The Dennis Family owns 200 plus acres (100 plus hectares) of farm land located in the center region of the country located in Gbartala Bong County. The City of Gbartala has eight (8) communities; the community surrounding our farm is community number seven (7) we call it the “Dennis Farm Community” with over 50 families. The ratio of children to adult is four-to-one (4:1). One of the local church in the community conduct activities on our farm using our main house living area. The church is referred to as the Dennis Farm Apostolic Pentecostal Church preaching point (**APCI**) with 13 families, 28 children ages 1-16 and 15 young adults.
- I teach Divine Principle every Sunday morning for an hour of Sunday school before service. Last September we conducted a three (3) Days **True Family Value** workshop for the start. This November after the harvest season we will be conducting a blessing of families in the community.
- On July 13 of this year we inaugurated our first community council of seven (7) members;
 - ✓ Four (4) men
 - ✓ Four (3) women
 - ✓ Two (2) Muslims and five (5) Christians
 - ✓ One (1) widower and one (1) widows
 - ✓ The local pastor of (APCI) Dennis Farm serves as our council chairman
- During my stay in New York last November I visited with Rev. John Kung and the Queens Family Church. The Qns Community donated new and used clothing, shoes, and other items alone with children books in support of our Tribal Messiah initiate.

- Rev. and Mrs. Doo along with the Los Vegas Family Church also supported our initiative through their donations. The funds donated by the (LVFC) was used to ship donated items from New York to Liberia via sea. The shipped items arrived in Liberia this July just in time for Liberia's **172nd independence anniversary**. They were distributed to the community by council members. (See attached photos).
- While still in New York. I purchase and shipped some technical-vocational tools, with computers and projector which I am using to train young adult men of the community important construction, technical and computer skills which are very much needed at this time (See the attached photos).
- Our farm provide resources for some members of our community and others in many different ways for both young adult men and families. Some of these are very labor intense but this is the only means forward for these individuals and families.
 - ✓ Four (4) families use the land to plant rice, cassava, peanut, pepper veggies etc.
 - ✓ Others cut trees and use the land to burn coal; which is sold as cooking fuel here in Liberia.
 - ✓ Yet still, others use the rock on the land for producing crushed-rock which is also sold and use for construction purposes.
 - ✓ Our farm provides these and other resources for individuals and families during these difficult times (see the attached photos/videos).
- This July, I submitted a broadcasting request to the government of Liberia through the Ministry Information for a medium range FM radio station. It was approved by the government (I paid the annual Broadcasting-Regulatory fee require by the government).

- “TRUE LOVE RADIO”** as the station is called will serve (educate) our community and greater Liberia; with the assist of today's technology *True Love Radio* will offer a far reaching potential for education, awareness programs, other numbers of activities, influences etc. Last year I purchase a FM transmitter while still in New York this was used for testing purpose and covers up to thirty (30) miles this what we'll be using for now.
- With a 5-10 Kilowatt FM transmitter we can cover the nation, reach others with the ability broadcast both in English and French just to name a few (See the attached doc.).

I will be submitting two other requests, one to the Ministry of Education for a grammar/elementary school and the other to the Health Ministry for a small clinic to serve our community and surrounding villages.

I offer this report with a repentful heart that we here in Liberia could not offer the government and people of Liberia to Our **HTP/TP** at this time as God's Nation. We'll continue to work for this goal every day until our activities yields such a result.

With **HTP/TP** as our center (sovereign); the territory owned, I intend to fundraising to construct these three structural facilities and engage in large scale farming which will also benefit the nation, continent and other areas (eighty percent (80%) of our food product comes from the international community/outside of Liberia).

I hope to have these projects ongoing as our offering for **Vision 2020** and as a token of our gratitude to our Beloved **True Mother, "God Only Begotten Daughter"**.

Many thanks to the Los Vegas and Queens Family Church for your generous support. Thank you, thank you and thank you so much for believing and supporting us through your actions.

Also, thanks to each and every one for your prayers and support which have allowed us to come this far, we look forward to your future support and continuous cooperation.

Sincerely,

Wilmot F. Dennis, II
