

CIG Japanese missionaries' workshop at LG, London 10th-13th/April 2015

Reported by the UK missionary's coordinator Tomoko Harris

There are 3 CIG missionaries to the UK - they are all young second generation from Japan. This is the second time that True Mother is sending young people as missionaries to providential nations. I aim to hold a workshop for them at least once year, as well as to support their daily activity. They are a source of power for witnessing in the UK.

Our lovely 2nd generation CIG missionaries

Early morning prayer with staff at the Holy Ground in the Hyde Park, London

We listened to testimonies from a few sisters, along with study sessions and discussions about witnessing, including the tribal Messiah and lecture practice with some UK 2nd generation. Between the workshop, we had quite a few guests for DP lecture. A lot of work was put into looking after these guests.

We also had unexpected visits from Dr Pak and Dr Moon - our special emissaries to Europe. We were very inspired to hear from Dr Pak, and by his devotion to the education and witnessing activity of the second generation. Dr Moon's talk about Japan was also very moving. We had a strong connection to Dr Pak and Dr Moon, and we could really feel their determination.

We would like to take this opportunity to say a 'Thank-You' to a special supporter, Yoshiko Tanaka, from Finland.

We would also like to thank all sisters who contributed to our workshop, and of course, our national leader, Mr Jack Corley for his continuous support for CIG missionaries. Aju!
