

Colorado Family Church: Church Council Transition

Michael and Adonia Hentrich
January 27, 2026

Dear Family members,

We are writing to share an important update regarding our Colorado Family Church Council.

Over the past several years, the Church Council has faithfully served our community, offering guidance, support, and care as Colorado Family Church has grown and navigated different seasons. After thoughtful reflection and discussion among the current council members and our pastors, we believe the Council has fulfilled its intended purpose during this time.

As we look ahead, we would like to transition from a formal Church Council to a Pastor Advisory Team. This change is intended to better support our pastors and align our leadership structure with the current needs and mission of our church community.

The role of the Pastor Advisory Team will be to:

- Support the pastors in their mission and goals for Colorado Family Church, centered upon the values and mission of our True Parents
- Serve as a sounding board for the pastors
- Assist with special projects at the pastors' request
- Be available for community members to bring concerns, issues, or feedback regarding our church life
- Review and approve church budgets

To allow for continuity, flexibility, and responsiveness, the Pastor Advisory Team will not operate with fixed terms or formal elections.

This transition reflects our shared desire to foster trust, collaboration, and mission-focused leadership, while continuing to ensure care, accountability, and open communication within our church family.

We are grateful for the dedication of those who have served on the Church Council and for the ongoing commitment of our pastors and advisors. Please continue to pray for our leadership and for the flourishing of Colorado Family Church as we move forward together.

If you have questions or would like to share feedback, we welcome your thoughts and conversations.

With gratitude,

Colorado Family Church Council
and Pastoral Leadership
