

The Truth about Life after Death Excerpts from the speeches of Rev. Sun Myung Moon

Michael Hentrich
June 2, 2010

In the spirit world, the earth seems like a speck of dust. The spirit world is tremendously vast. If you say, "I'd like to share with everyone this joy of ideal love and hold a banquet, so women and men should wear such and such clothes and appear now!" They will appear immediately. Meals and fruits are no problem. They will appear as you wish, momentarily. If everyone gets full, what happens to the leftovers? Do they wash them in the kitchen? They disappear immediately. There is no kitchen there. You need not worry about anything. There is no food factory or car factory. There are various flowers. You can create as many houses as you want to respond to your level of love. Do you want to go to such a world? Do you want to see it?

Would you become tired of food because you eat it every day? Do you wait for the food to come every day? Likewise, you have to eat God's words every day, even after you go to the eternal spirit world. That is why you have to train yourself while on earth. It has to be your desire to know: "What kinds of words will God speak to us? What meaning do they have?"

Think about it. Is there a bread factory in the spirit world, or not? Is there a factory that produces Coca Cola and juice, or not? Why not? You don't know why not. Right? Is there a factory that manufactures cars in the spirit world? Would you say, "I want to move around the spirit world in a luxurious car," and then move around there in the car? On this earth people boast of owning a Mercedes Benz, but in the spirit world there is no need for cars.

What would you do in the spirit world? Would you eat food, or not? Would you prefer to eat food, or not? Centering on what would you eat food there? You eat centered on Love. A person who could not have love on the earth won't be able to open his mouth, no matter how much he wants to eat. This is the rule. Your mouth will not open if your heart loves only yourself and does not center on loving others. Even when you try to pick up food with chopsticks and bring the food to your mouth, the chopsticks would move away from your mouth. You may try once, twice, three times this way, saying "Arrgh!" How disappointed would you be. Everything is possible only when you have the concept of true love in the spirit world. Without it, nothing is possible. In the spirit world, if you have love for others, then as soon as you say, even in your imagination, "I need a car made of diamonds," It will appear. Even without a car, however, you will be able to travel hundreds of millions of miles, or even a distance of a hundred million light-years.

When you go to the spirit world, do you earn money? Do you sleep for hundreds of millions of years? Please think about this. How dull it is! You do not have to sleep hundreds of millions of years or earn money. You

can eat food anytime. When I say I am hungry and want "one-hundred-million dollar foods," I will be given them immediately.

So it's important that we eat spiritual food. Do you know what spiritual food is? When you are hungry and you have to choose between spiritual food and physical, you have to think that spiritual food is more delicious than physical food. In order to stand on the side of God, you have to train yourself that spiritual food is tastier than physical food, and that the taste of life centered on spiritual power is better than the taste of life centered on physical power... We have to eat spiritual food, enjoy spiritual life and revel in spiritual love, rather than just enjoying the taste of physical things like food, sleep and sex. The spiritual taste should be better than all external tastes combined.

There is no need of cars in the spirit world. You can travel millions of miles in one moment. How many years does it take for us to travel to Venus by a spaceship, nowadays? We can get there in a moment. This vast universe is our own activity ground.

When you go to the spirit world, do you think you will be flying like this, "Hooo," or not? You can fly, "Hooo," but you cannot see anyone flying because it is too fast. Since true love has the fastest speed, the God of true love can take one step and reach anywhere in the vast universe, 2.2 billion light-years wide, and work in many places all at once. You could do the same. The spirit world will become the stage of your activities, even though it is such a huge universe, many hundreds of times the size of this earth. There are so many mines of dreams. So much gold, silver, and precious stones. If you are someone who loves flowers so much, flowers will wake up from their sleep and open their mouths all of a sudden in order to welcome you when you approach them, but if you go away from them, they will wither and sigh "Ahh!" in disappointment.

(In spirit world), you eat the food of love. You look at each other with loving eyes. Everyone does so. There is no word to describe the beauty of the spirit world. You never get tired of listening. There is no concept of being sleepy there. Do you understand? There would have to be a cause for becoming tired, and there must be something that can make you excited. There would have to be something that bores or disturbs you. How can we get tired if there is no cause? In spirit world you can keep your eyes open forever, and you can hear forever. You can live forever, even without eating. Would you eat rice because you are told to? Would you? I know that I do not eat just because I'm told to. In the spirit world I can wear clothes in whatever way I want. "Let's wear a gold suit. That princess has a 517-karat diamond, so I want a better one. "Give me a 17,000-karat diamond." When I say so, it will appear. I can have that. We can create everything.

If one day, while you are walking, you are instantly killed in a traffic accident, you may not think you have died. The spirit world is like that. You say to yourself, "Ah, I have come to a strange place. It is a little better than my own neighborhood." Opened in front of your very eyes is a vast space. A limitless space. That is why you do not think you have died. But what an odd place it seems to be. People who used to be around you appear when you want to see them, but they do not appear unless you call them. You feel very much alone. There are guides in the spirit world, though. They come and explain to you, "You have come to the spirit world. You have died. You have died."

You cannot realize that. You have a feeling that you collided with a car far away somewhere, as in a dream, but you do not feel that you have died. You are still connected with earth that way. You are dazed without knowing that you have come there because you are dead. You cannot grasp it with your senses. You try to go to your house, saying, "I have to go to my hometown." How can you go back to your hometown in the physical world? You can't. Then people come and teach you. Your ancestors from some generations ago come and tell you, "You are no longer on the earth. You have entered the spirit world." You finally say, "Ahh, the spirit world is this kind of place."

If we could complete our lives during only our seventy to eighty years on earth, we wouldn't have any problems to worry about. However, when you live a life that involves eternity, it's a different story. Spirit world exists. What do you think your reaction would be when you pass to the spirit world? You have no idea. It is a magnificent and limitless world. The first thing you become aware of, when you get to spirit world, is that the main thoughts there are of earth itself and the society in which you lived, and so on, rather

than just your own hometown. On earth, there is discrimination between cultures and differences in their backgrounds. Sometimes other people's ways are incompatible with your own. While you were going through your life in this world, you wanted to be in control of everything by insisting on your own point of view.

When you go to the spirit world, you want to leave your values behind for others. However, your forgotten past life will be replayed vividly in the spirit world. Your past will not go away... You only meet strangers when you first go to the spirit world. Imagine if you could meet someone that you know in such an unknown environment. When you think there, you cannot escape your emotional connections to the past. You think about the people you loved in the past. Once you are there, you would wonder how your mother and father are doing, and your grandmother and grandfather. You would think this way. Whom do you want to meet most in the spirit world?

If someone regrets his past at the fateful moment he ends his life on earth, all the facts of his past life will pass through his mind as images. Even if no one explains to him what kind of person he is, he will know it by himself. The life he inherited from his ancestors, the circumstances he has been connected with, the situation he leaves behind, and all the past, will appear as images in his mind at the last moment of his life... There are people who say, "My whole life course, from birth to death, was merely a period I spent as a passerby." If such a person reflects on all his past situations and feels that he does not want to remember the past, he is a miserable person. But, if the more someone reflects on his past, the more joy fills his face, then fear of death is only a moment of discomfort for him.

To live an eternal life is your lifelong responsibility. The eternal life can be determined by connecting your life, day-by-day. One year contains 365 days. You divide one year into 12 months, and you divide one month into 30 days. Thus, your life is a continuation of living day-by-day... The valuable content of your whole life isn't determined after you have gone through your life. Your daily life, day-by-day, determines it. Therefore, you have to live life well. What is the meaning of living life well? It means that you should live a representative daily life meaningfully. I think it's right to conclude this: "I lived life well today! It is a memorable, proud day in my whole life!" If you live your life well, you can have a most valuable daily life throughout the life course. If you have a day when you could live valuably, you cannot forget that day in your whole life.

Throughout many historical ages, many of our ancestors died. If those who lived a hundred years or less, thought and worked for the sake of the whole, for the benefit of the whole, what they did remains even after a thousand years. Isn't it so? However, if they lived centering on themselves, they had to perish. They constantly fell, and they destroyed the whole. Because they lived their lives that way, problems occurred...

We must reverse individualism and the course of life that pursues one's own benefit. We must change this. Somebody must declare this. To reverse this self-centered lifestyle requires thoughtfulness.

The path of saints, and the path of ordinary people, are different. Saints are those who tried to live for history, the world, and the future. Ordinary people are those who tried to live for themselves, and tried to make the world serve themselves. When ordinary people think about their past, it is dark. But, when saints think about their past, it is bright. What is that brightness? It is not for themselves, but something that can bring about the nation of hope.

Have you ever thought about receiving an order to appear before the court of judgment in the spirit world? Someday, the order will be given to appear before the court of judgment. To manage and control that court, there has to be a judge, a prosecutor, and a defense attorney. Who are they? The judge is God, the prosecutor is Satan, and the defense attorney is Jesus. Only Jesus can become the defense attorney.

Even if you don't want to die, you will die when the time of death comes... There are two ways to go into the spirit world: those who go there after living their own life span and those who go there without living their own life span. Among those who went to the spirit world without having lived their own life span are those who died early due to punishment, and those who went to the spirit world to indemnify the sins of the tribe and the world. If the three best-known youths around their thirties in town have died, good fortune will come to the town. If three of the most distinguished youth in a clan died, good fortune will come to the clan... If God sets one person in a central position who has a value of a thousand people, and lets him go the path of death instead of another, and if these one thousand people are impressed and grieve, learn, and follow his way of life, their tribe enters the realm of his blessing. The reason why people learn and follow the thoughts of loyal subjects and sages is to enter into the realm of the same blessing.

Man wants to resemble God. And, if he is a son or daughter of God, it is inevitable for God to have an idea to let man resemble Him. I want to resemble God, and God wants to take me with Him. Therefore, we will seek the way and make it possible. Therefore, man is born wearing a body by which he can resemble God. God waits for the day of birth, and human beings wait for this day as well. Do we need a day of birth when we are born as a being resembling God, or do we not need it? What is it? It is death. Well, then, should human beings welcome death, or shouldn't they? What is the purpose of our death? We should say, "We die for the sake of God's true love."

The reason we take off our physical body is to participate in the realm of God's infinite love. To be born in God's love is the meaning of death. But in human words, we make a big noise, saying, "Oh, we are dying!" Well, does God merrily laugh or does He say "Oh, no!"? When God looks at people crying at this in the human world, does He laugh, or what will He do? Does He feel sorrow, or is he joyful? Leaving the realm of limited love, man enters the realm of infinite love.

Isn't death the moment to welcome this joyfulness? Isn't this moment of going through the path of death like a second birth? If this is the case, isn't God joyful about the day your physical body is gone? Is God more joyful when man is born as a son who can act for the sake of love in the second, infinite, expanded, world? Why do I talk about such things? You cannot establish a relationship with God without liberating yourself from the fear of death. I am speaking of this because you must understand this fact.

Man goes through three worlds: the formation stage, the growth stage, and the perfection stage. Man lives in the water world inside the mother's womb, on the earth, and in the world of space in heaven. In other words, man goes through three stages: the water world in the womb, the next hundred years when man lives on the earth, and the world of space where he flies.

While man is inside the womb, does he try to get out to the outside world, or does he want to stay there? If he has to go out through such a small hole, does he say, "Oh, no" or, "Oh, that's great"? Suppose you are told, "The house you live in is all destroyed. And, the value and source of nourishment where you are is all destroyed. Your head and body have to swell. All this happens when you go out. Is that okay?" Do you say no, or do you say yes? Just before the time of delivery, the mother desperately pushes and the baby says, "Oh, no!" until the time of childbirth. But, at last, the mother pushes him out. When this happens, one world completely disappears and man begins to breathe in another world.

When man is born, he is born from the deepest place in water. The age of the womb is the age of water... When the baby is inside the mother's womb, he is floating in water, isn't he? Looking at this, we may say, "Oh, how can a baby live when he can't breathe?" Is that so, or not? While a baby lives in water, he lives by a hose connected with the stomach. Through this hose, the baby sends and receives water... The situation (now) is exactly the same. In the world of air, the spirit self is attached to the physical self like the embryo in the womb. When the physical body grows old, and the spirit self tries to free itself by kicking the physical body out, the physical body may say, "Oh no, I'm not dying! I'm not dying!" When God looks at this, does He smile and sympathize, or does he say, "You fool"?

When the embryo is born, he becomes the object of love to the mother and father. Likewise, this earthly being must be reborn again as a spiritual person who is the reciprocal object of the eternal God, who is its spiritual Father... After the embryo is born, he can become friends with his father and mother. This place is the earthly world. Man is born in the earthly world where he can share love with his mother and father. Likewise, man must be born in the spirit world, where he can share love with God, as the replacement of parents, by whom he can connect with the spiritually infinite world.

Those who breathe love on the earth are not dead, but are alive. When man is breathing through the bellybutton, he is preparing for the world of air, to come. He is living through the umbilical cord. But, when he destroys the placenta and comes out into the new, higher-dimensional world, how much does this change? Air is supplied on a higher dimension. He comes out receiving a supply of air. After you leave this earth, what will come into you? It is not air, but love, that you breathe. You receive elements of love. Do you understand? You must not just eat meals alone! The bodily part of the self which eats meals, will die... It all dies. After birth, you have a second existence. What should you fulfill during the period on earth? During your period on earth, you must form the new character of love!

While we live in this way, what should our body do now? While you were breathing through the umbilical cord in the womb, at the same time you were preparing the nostril which is the air pipe. Then, when you dash out from the womb, you switch the use of the organ and begin to breathe. Likewise, what should you do in this world now? What you must do after your birth is embody love. You must breathe the air of love. You must inhale the air of love from your mother and father. You must go through all processes by the supply of the air of love...

What is going to happen when you die? You kick off the second world and are connected to the third breathing organ, the organ of love. Do you understand? You kick off parental love and brother's love and enter the world of love which is in total harmony with the original Being of the great cosmos, God. The spirit world is filled with the air of love. The air of Love! Therefore, you must prepare now, while you are in the earthly world, pipe equipment to breathe love. So you need experiences of the spirit world. You can be immortal only when you become a person who can feel spiritual love and breathe the air of love.

Because your new self has been designed in this way, you must destroy the old self, sooner or later. Death means to inherit the elements of love, after the destruction of the physical organ, through which the body has been breathing. Love is invisible. Your internal structure is growing centering on children's love, conjugal love, parental love, and all other kinds of love. Just as an embryo grows well in the womb, when one lives in accordance with God's principles, shouldn't one grow properly on the earth?... Until that time, what shall we do? We must be trained so that we can fit in at that time. Only when we see and enjoy our mother and father can we come to like God. Only when we like our spouse can we come to like God when we go to the next world. The training ground is the world on earth, now.

What constitutes the spirit world? The air of the spirit world is love. Love is air. Your mind and body have to experience love and harmony on earth. Once you create the sphere of experiencing love and harmony, there is no place where you cannot communicate with each other, instantly. Only through love. You can be connected with God in the way a bud on a tree branch is connected with the root of a tree. You naturally sense when God is rejoicing. You will know that God's banquet is going to be held in the east. You can get there automatically.

What you need on earth is love, isn't it? What is an orphan? Why do you call a child who cannot receive parents' love an orphan? Because there is no love for him that can be eternally connected to the spirit world. Therefore, those who live alone, unmarried people, are pitiful.

All of you possess a spirit self and a physical self. The cells of our spirit self, even though invisible to our own eyes, exist in just the same way as physical cells. The spiritual world exists just as substantially as the physical world, even if we cannot see it. Then, when can a spirit self and physical self become one? This is the problem. It is similar to a tuning fork. When a tuning fork is struck, it can make a nearby tuning fork resonate at the same frequency. The spiritual situation is parallel. Once God's love matches perfectly with our mind, our body automatically responds. Therefore, that which lets our mind and body resonate 100 percent, and allows them to come into the realm of oneness, is not God's wisdom or power. It is only love that does the job. Only love.

There are cells in the body and mind. You know that there are the spiritual five senses, and that we have a spirit body, don't you? The cells of both the internal self and external self must resonate with each other. The spiritual being, which is our internal self that can live for eternity, and the physical being, which is our external self that can live in the Kingdom of Heaven on earth only, must be able to resonate with each other, centered on love... When the resonating spirit body and physical body become harmonized, centered on God's love, spiritual cells and physical cells engage in perfect motion together. Perfect motion. You need to know this. Therefore, when our eyes become perfectly harmonized with the world of spirit, they can see the whole land of the spiritual world, as well as the land of the physical earth. This is because they engage in perfect motion. Isn't a microphone the same way?

If its quality is good, the sound can vibrate 100 percent. Similarly, once our whole being becomes one with the power of love, centering on both spirit and body, and creates a realm of explosion, the spiritual world, physical world, and God cannot help but resonate with that realm. It is the same with the hands. If my hands are in such a state of oneness with true love and touch something, electricity runs through the creation. You can feel it. Once there is such electricity, everything wants to cling to you. Once such a person appears, God, and even the whole universe, wants to cling to and follow him wherever he goes. When there is a perfect "plus", a perfect "minus" will always follow it. And if there is a perfect "minus", then if there is not a perfect "plus", it must appear and follow it. This is a universal law.

How is life in the hereafter?... You can feel the flow of your blood and the beat of your pulse in the spirit world. It is the same, although your body is only of spirit. When you go to the spirit world, you are able to even go through a mountain. There is no obstacle against motion in the spirit world. Since the high spirit world is the place for those with heavenly original character, it should not have any obstacles. Everything goes through. Because spirit world transcends time and space, people who lived hundreds of millions of years ago exist there. They are there. They are able to appear as young as they wish. Therefore, you are able to see such people.

You do not age in the spirit world, since you are in the most wonderful position and are intoxicated with the heart of love. My mother must be old now, but in the spirit world she looks the way she was when she looked the best to me. Always. How boring it would be if we had only bright, sunny days every day! Fog rolls over places. The moon can be ringed by clouds and sometimes becomes hidden. How artistic it is! Think about it. It is the world of art. When you see in the physical world fine days, cloudy days, and so many variations in the weather outside, you are witnessing a world of art. If you can sense love in the environment, you will become a person who has the capacity to create a sphere of many different kinds of emotion. With love, you can make a fine day in the spirit world become cloudy, or make fog roll over the spirit world, if you wish. Everyone in the spirit world will be interested in you. They will all say, "It is fun to be with him."

Is religion necessary in the spirit world? Is Presbyterianism or Roman Catholicism necessary there? You go into the realm of living with God, so religion is not necessary... Then, what is necessary? The most precious thing is to be able to receive God's love.

Nothing else is necessary in the other world. You have to love God more than you love the world, your nation, your spouse, and your child. That is the Principle. Mother says, "Oh, love God more than me, please. Then you love me." Only with that mind can she receive high-dimension, godly love from her husband.

Knowledge, money, and power are just a small part of the values people (should) pursue during their physical life. Can a professor be proud of his knowledge for one thousand or ten thousand years? Can he continue to hold it as he moves around and shows it off? Your knowledge is with you only during your life. The same for money. When you say about someone that he is great, isn't it usually because of his knowledge, his money, or his power? Isn't that the case in this world? However, God sees those values as nothing. They are useless in the spirit world.

We are strangling ourselves with things like money, knowledge, and power, which do not exist in the spirit world. The spirit world does not have those things. In this world, money, knowledge, and power are needed, but there is no need of them in the spirit world. People in the satanic world have been longing for them. The spirit world is a world void of power struggles. If you are into power, you cannot live anywhere in the spirit world. Nothing in spirit world welcomes you. You cannot have a connection with the spirit world, even if

the spirit world itself becomes interested in you and tries to unite with you. Opposites in essence cannot become one. You couldn't be connected with a position that interests the spirit world.

Centered on what can humankind and its history be able to solve problems and become complete? People should know God. God is a God of character. God cannot be vague. We ourselves are real. Since we are beings of character -- with intellect, emotion, and will -- then our subject, God, is also a God with intellect, emotion, and will... What is the central attribute of God among all His attributes? It is emotion. Love. God needs love most. In the Kingdom of Heaven, we do not just live by knowledge. Because of your ignorance of the spirit world, you do not understand. But, it will take less than a week for you to learn everything. The spirit world is like a mirror in which you can see your own heart reflected. Spirit world is a place where you can obtain, within a week, all the knowledge that a very intelligent person has accumulated all his life on earth. Because you see things through the light of your heart, you will automatically understand the world and all its related connections. Only through emotion and heart will you understand whether a person is your object or subject. It cannot be done through knowledge, or any other attributes of God.

Just as an electron revolves around a proton, human beings are made to revolve around God. God can pursue the providence for restoration because man's mind, as if an electron, naturally relates to God's mind as its proton. So if one searches for the word of truth, even all by himself, he can come to feel the vibration of God's life and the harmony of God's love. Thus, the way to search God's life and love through the way of truth is the way to become valuable oneself... The truth has a central core that is eternal and unchanging. Then how can we search for the truth, judging what is good and what is bad in this evil world? You have to become totally selfless and take the lowest position. The Bible says that whoever exalts himself will be humbled, and whoever humbles himself will be exalted. Man's essence is spirit. Therefore, when you go to the spiritual world, you will realize more deeply that the essence of being human is to live for the sake of others.

He is our "Father". We have to call Him "Heavenly Father." He is your Father, who caused your birth... You will call your physical father your brother once you go to the spirit world. You will not be calling your physical mother your mother, either.

In the spirit world, grandfathers and wrinkled grandmothers will look much cuter than you. They will look more beautiful. They can remain in that state if they have love. It is a unified world, and it is a beautiful world. Can you behave in the same way as before when you meet your grandfather and grandmother? Will you go backward? How wonderful it would be for us to see beautiful grandfathers and grandmothers! What a great scene it is to behold in the spirit world when a granddaughter approaches and greets her grandparents.

If you call for your great-great-grandfather, you will be able to meet with him. You will be able to find out who his grandfather is, and who your ancestors are from the fourth generation back, the fifth, the hundredth, the thousandth, all the way back to Adam and Eve's! If you wonder what Adam and Eve look like, they will appear and say, "This is how we look." You will say, "My eyes resemble Adam and Eve's! My nose, too! And my mouth!" The shape of your faces would be similar... If we can meet with our ancestors of the first generation, what about God, who created our ancestors? We can meet with God. Do you know that? The family is the place where the invisible God expresses His love. Understand? All the ancestors in history, who were born centered on love, are dominated by love in the spirit world. The same love.

Can you meet God, or not? But even if you met God, you would not know it, because God doesn't have a body. Therefore, in order to manifest His being to all His creation, Heavenly Father used Adam as His body, showing His face through that of His son. We should know that this is God's ideal of creation... Had Adam and Eve not fallen, they would have occupied the positions of heavenly father and mother for eternity in the spiritual world. But due to the fall, their positions are far different. Had there been no fall of Man, everyone could have gone to the Kingdom of Heaven in the spiritual world, simply by attending his own parents as though he were attending God.

When you enter the spirit world, you do not need greetings. You will understand as soon as you meet others. You will know this person used to live on earth so many thousands of years ago, or so many hundreds of years ago. Some people say that biblical history is six thousand years, but I say they should be more reasonable. They do not understand the spirit world. Biblical history actually spans millions and tens-of-millions of years. If we call for our ancestors, they will all appear at once. As soon as you see them, you will understand each other without talking. Your whole being is on display. Your forehead has to be deep. The deeper it is, the more blessing you receive. You will immediately know in what order each of you belongs, higher or lower order. The order is automatically determined. What determines the order? Love. Love determines the position of each person, just as on earth. So you cannot enter the Heavenly Kingdom unless you become God's sons and daughters.

When you say with a strong heart of love that you want to meet with a person who is a hundred million miles away, he will appear at once. When you ask him, "Why did you come here?" he will say, "Because you called me." If you ask him, "How many miles have you come?" he will reply that he came from a hundred million miles away. Spirit world transcends space. The universe becomes your activity station.

God's original love energy and life energy travel many thousands of times faster than light and electricity. If you wish to meet with someone who is millions or billions of miles away, that person will appear. When you prepare your heart and say that you would like to meet with someone you love, that person will appear. Isn't it great? When he appears in front of you, you will know which level you are on. You will know if you are higher or lower than he. Even if he was your closest friend, he will bow to you as soon as he emerges if you are higher than he in love from the heavenly point of view. Even your own mother will bow to you. Your ancestors from way back will do the same. The spirit world is such a place. Those who used to live eight or ten million years ago will appear and bow to you. Biblical history is what, six thousand years? It is like a madman's story. How much has changed over the past thousands of years? People who used to live then could sense Heaven much more deeply than those who live now.

When you say, "I want to meet with such a person," he will appear. You will ask him, "Are you so and so?" He will reply, "Yes I am. I used to live in such and such a place on earth hundreds or thousands of years ago. You wanted to see me? Do you have any questions?" You will say, "Yes, I do. I taught this way. How different you and I are!" Do you understand? Both of you can naturally share many stories. It does not take time. Just from the beginning of meeting with each other, you will understand each other.

How big do you think the spirit world is? People there can appear from a distance of many hundreds of miles, many millions of miles, in a blink of an eye. You will know where a person comes from as soon as you see his forehead. When you meet with someone from many hundreds of years ago, he will bow down his head to you if the standard of love in your character is higher than his. What moves anyone is love. How much have you loved humankind? How much have you loved all the creation that God has created, centered on love? Can you love them in the way that God loves them? That is the standard of measurement for everything. It is immediately measured. It is instantly known, faster than by a computer. A woman who is married proudly talks about how much her husband loves her. Likewise, in the spirit world, you can be proud of how much you receive God's love. Original love. That is love of the highest level. From there, each level is determined.

How many people are there in this room? If there are five hundred, then there are five hundred types of people, right? Everybody is different, right? Among all of you, people with similar angles gather in groups. This occurs more precisely than by computer. You can tell your own angle just by passing by others. Within a week, you will be able to peek through everything, behind everyone, and even to the bottom of the warehouse of a person's secret world. Words are not necessary. You can sense what a person's heart is trying to tell you. Do you understand? It is a world like a grandfather computer.

If you go to the spirit world, you will find it to be a vast world, and it consists of three stages. Who will go to the top? Those who lived for others more. It is the law there... But, to those who live for themselves, the opposite world will unfold. It also consists of three stages. There, all of them reject you, saying 'Huh! We don't like someone like you.' There are two kinds of reactions. Everyone will reject someone who lived for himself, and everyone will welcome someone who lived for others.

You may not know much about the spirit world, but True Father is an expert. I have experienced the spirit world more than anyone else has. The spirit world is my special major field... We are destined to go there, regardless of our will. That is our way of life. We are going the way of a traveler. What can be a problem in your life? Whether you are living more for the sake of others, or for yourself. If you lived more for the sake of others, you will go to the Kingdom of God. If the opposite is true, you will go to hell. You may be unable to believe this fundamental formula now, in your present situation, but when you die, you will come to understand.

If you look at this from God's position, is God a God of joy? The religion that thinks God is joyful has no brain and no common sense. The one who is most sorrowful is God. If God has shed tears and received pain until now, that is not for God, Himself. God is still shedding tears for this universe that He created, and for fallen humankind. These are correct words. Why are they correct? Because He is a God of Heart.

When you look at the spirit self, there is the spirit body and the spirit mind... You have to understand that spirit and mind are two different things. God, Himself, cannot relate directly with our mind, nor can he control it. That is why your mind is changeable, going one way, then the other.

The Bible says, "Love your God with all your heart and all your mind." Why do you think that is? The central point of all is love. When you do nothing but concentrate all your functions and consciousness on loving God, you will go straight up the elevator. You have to experience the wondrous world.

What is the center of the spirit world? The spirit world is structured centered on the one, absolute God. The absolute God is the originator of the cosmos who created heaven and earth. There is nothing He has not created. The whole universe belongs to Him. It feels as He feels. The whole universe exists in relationship to Him. For example, our four-hundred trillion cells are all connected with our brain. The brain feels what each cell feels. All creatures have been in the same position in relationship to their Creator ever since the universe was created. A human being is alive with consciousness, pursuing goodness and higher value, as well as having a sense of sorrow and sadness. All these attributes originated in the causal being, God. We can say that human life is the result, and we are going through the process of connecting ourselves with the original cause.

Don't you wonder whether the spirit world has completed itself? The spirit world is still incomplete. Why? The hierarchy system of the spirit world was originally supposed to be centered on God, True Parents, and True Children. Everyone is supposed to be connected with this hierarchy system, but it is not done yet. It is not done on earth yet, either. This hierarchy must be established on earth first, then in the spirit world. If the condition on the earth is taken care of, then the spirit world will automatically follow. In other words, the organization of the spirit world is meant to be the hierarchy system centered on True Parents, which is the ideology of unfallen Adam, centered on God, but it has not been accomplished yet.

In the Oriental almanac there are twenty-four seasonal divisions, based on the lunar calendar. In the spirit world there are twenty-four elders, centered on the twelve disciples of Jesus.

The whole world will be united once the satanic world is heartistically united with this sphere of love. Then, there will be no more border lines, and this world will be the Heavenly Kingdom, where nobody will be prevented from entering any of the 12 pearly gates in the directions of east, west, south, and north. Everyone is welcome. You enter through this gate and come out through another gate. You are able to freely go through any of the 12 gates. Actually, there are 144 gates --12 gates for each of the 12 directions.

The one who makes excuses for himself cannot enter the Kingdom of God. The position of absolute faith is not a place to excuse oneself. There is nothing to say... Therefore, the one who is centered on himself cannot enter the Kingdom of God.

Because I know very clearly all these things about the spirit world, I do not want to live in the physical world. The vast spirit world is all constructed centered on love. Everything is complete if you harmonize yourself with love and possess the sphere of God's Heart. The history of creation will continue forever. Do you understand? You have to accomplish what you have planned by harmonizing yourself with love. Once you determine and command it, it will unfold at once.
