Good morning to you

The 1421th Tianxin Garden is sincere all night

Summary

I am grateful that the true family fourth rank foundation, Tenai Shishoshi family, and Tenichikoku leaders, over 50,000 people all over the world are devoted to their devotion with one heart. In front of the detention center on its 36th day, more than 100 people staying up all night devotionally with Honjo and spending a cold night. "Don't catch a cold" I think mom's only saying to people in front of the detention center. 121,112 people participated in the major role yesterday achieved a remarkable record of victory. In the deep interest and love of the true parents and parents of heaven and earth, I think that the result of all the leaders and blessed families of heaven and earth have achieved it with a single heart and one heart.

The status report of the teacher's mother's mother's mother's mother

"With the colder temperatures, there are concerns about whether the mother in the detention center won't

be cold, whether her health is protected, but hearing that the heat was turned on at Friday's visitation, I hope that eases everyone's worries. Today the court deliberations began, and the morning schedule was finished, and she looked fatigued, but she was waiting for us with a warm and loving smile. When the missionary Bunshin reported that "More than 120,000 people participated in this important job, and everyone is collecting their hearts for your mother with one heart," she said "I know." "I am grateful for your hard work and hard work every day outside when it's cold." Mother seems to be sensing our integrity right away. Since the results of seericity are not coming out immediately, you may be worried about whether we are short, or what seericity means, but my mother has always felt a lot of love and gratitude towards seericity, so I hope that we can overcome this difficult period as a family, understanding that everyone's practice and practices help her.

Jung-ah and Jong-siku participated in the major role, and reported how they clapped and played hands by themselves, and her mother was happy.

A missionary from Bunshin reported that he took to the streets with the youth on Sunday testifying about the family union and mother. "Mother said, ""We must quickly tell the truth of the Household Union before this people." By the time we cross 80, we must testify that we made a true home movement in heaven for peace for humanity, for humanity and one family. The truth must be revealed by your hard work. and gave me the word. And I was pleased to say, "Thank you for having a positive influence on Nobuoki, Nobuoko." With 1 minute remaining, she sang "Chewan Navi" with full sincerity, and mother exited, waving her hands gently as usual. Mother is always worried about us and our providence first. Feeling that the only thing we can do is depending on what standards we offer to our mother will change, so I personally am grateful to all of you who have worked hard to this moment. Together, I hope that we will continue to work

together for your mother until the end without giving up. "

Even in a difficult position, this is a mother who gives a little strength to hear the victory report of a major role. On the day we can come out, we must be the ones who show the foods that grow more together, become more united, and work harder. We must make a sincere decision and give our all to fulfill every word your mother says in prison.

Tomorrow, I asked two branch chiefs (Central and South American chiefs and East African chiefs) to report to me. The situation is really hard and tough, but we have to do our best on the basis that our mother has been devoted to, so that she can win her dream of branching providence in the five ocean and six major provinces. In order to fulfill the standard, the places that continue to proceed with all the best of Tenshin-no-shin-sincerely, will surely grow and the food will live and move. Mozambique is a difficult country, but many people who studied at schools built by Women's Coalition earn more than 100 million annually. Those people donated the training fees for all 40 people who participated in the 40-day training. It is considered that this is the time for education in all countries in the whole world and to develop excellent people to be the masters of the real heavenly kingdom. Our church should not be difficult without ever making a comeback. If our second and third generations work hard to truly become masters of the kingdom of heaven in the future, we can definitely achieve the world that our father and mother wish for.
