Opening Prayer Of Gratitude

Most Honorable Heavenly Parent

Belove True Parents HEH

Thank you so much for the grace and love, guiding us to Cheon Shim Won...

True Mother said that She trusts us although we are lacking and said again and again that we must move forward in oneness with Cheon Shim Won and with Spirit and Truth... and if we pray earnestly, it surely will be fulfilled and She trusted us again and again, but when we see this painful result, we must not let Mother's Word fall to the ground, but have life resolve and fulfill Her Words... True Father offered devotion until callouses on His Knees and prayed for 17 hours without eating anything and in this greatest war, we pray for Your Guidance to come to life-or-death determination, True Father will mobilize the entire SW and work upon our behalf and solve all the problems on Unification family and that we can raise a wind for crisis into creativity and surely bear fruit and devotion with filial devotion will surely produce miraculous results... Our earnest wish is for the health and well-being is for True Mother, and please protect Her and work Her release.

And through Cheon Shim Won devotion we will bring the day of victory coming...

Testimony

A Gon I

Spiritual Academy trainee

Last year December, due to bullying at work and negative things happening, I wanted to let go of what I was facing... and wanted to reflect and in the Workshop realized superficial faith and ask to know the desperate heart that True Parents are showing and wanted that to root to me... and I was able to meet my emotions and to realize them was able to repent after emptying myself and gratitude came and all who guided me, I was able to be grateful and it was the first time to feel True Parents's warm Love and was able to become anew and wanting to repay True Parents, I was able to join the Academy and join the cafe and had some experience in a bakery and then support Heavenly Parent and True Parents with my skill and with faith spent each day with gratitude.

But unexpected problems and being away from the TC, I worried about distancing from my life of faith and saw a weaker part of things rising up, criticizing myself, even though those around me were kind and warm... but negative thoughts came to me comparing myself with others and a lot of negative things came to me.

When I first resolved, I had a pure heart and then realized I was losing what I gained... wanted to develop the cafe and feel my heart have deep peace as They were embracing me.

True Parents don't want me perfect so much as just to develop more... and the parts I saw that were inadequate were how I could grow to realize... Although we were volunteers supporting each other, I could feel they were truly my family and when I made a mistake, they covered for me and in many ways also... And one shared that, 'Heavenly Parent knows everything' and that trembled my soul and saying, 'It's okay let go forward together' and then I found a driving force in that idea of family, how we truly think of each other and move for each other, and they allowed me to settle my faith when I was shaking and that is why I was able to rise again and want to be used by Heavenly Parent's... Before thinking about what I can do, but now how can people be connected with True Parents Love from here... and then had joy and resolve to spread True Parents Love and give joy to others.

Although lacking, I will move forward with faith in True Parents... and at the Cheonwon Complex the fact that I could serve here will be a precious memory forever... And gratitude to PL and all who supported me especially in time of difficulty. TYVM...

'Let's Love'

Testimony

Johanna

youngest of the family

I grew up feeling the love of Heavenly Parent and True Parents like my own Parents...and even in small instances felt Heavenly Parent and True Parents listening to my story, and I tried to live brightly. However, going through a period when my family was deteriorated, I felt Heavenly Parent was the only One to turn to, but felt no response from Heaven and turned my back on Heavenly Parent and True Parents, even offering tithing, my faith almost disappeared.

It seemed when I returned to the church outwardly, my family regained some stability. I realized that at the center of it all was True Mother Who endured silently to protect family Heavenly Parent could love and protect children, and I who wanted to escape was able to return because of Her Love... And as I attend the spiritual 40-day, I could experience True Mother as my own Mother in a way deeper than before...

Entered the Academy and gained realizations as that during the 9th 3-day Workshop (previously participated as coordinator and the Director said we must offer prayers that deeply empathized with the members, but those words did not deeply reach my heart, and I didn't understand how desperate the members were... and I was left with regret.

A strange surge of emotion when looking at the numbers that came to church and with sleepy eyes, and the realization that the result was a continuation of devotions day after day and thought how earnest they must have been to do this and at the center must have been restoration of their families and for Mother's return, and with the heart to continue, I was assigned for this 3-day Workshop and I interviewed a member that was praying with so much tears...And that person had felt nothing and was in deep difficulty but realized how far she drifted from True Mother, and wanted to feel True Mother as her Mother... and I thought that this desire was not only hers but of all the members, and I too cried with the same earnest, hearing her's resonated deeply with me, and members here not just for their own personal circumstances but to realize Mother's Heart and return more quickly.

Thinking about how they continued prayer at their respective sights, I also wanted to hold that resolve. Leaders felt so much like my own parents, and felt grateful and the person that received great comfort was myself through the interviews, reflecting my own attitude and with the Love that seeks to be one again resolved to continue closer to that Love and attend the members as my parents had and when my mother entered the Workshop was 40 days apart and then through my mother's love, I could return though it had not been my own idea or desire...

And in the Workshop, able to offer devotion and then realize the way of parents I was not able to see before and gratefully to my parents and Heavenly Parent and True Parents that I could be in such a place with members that always keep the offering of devotion...

HJ Report

9th Attendance Resonance Workshop

Respected leaders and respected members around the world

Hello everyone,

I am coordinator of Cheon Shim Won team and offer my greetings, bow... Some of you may see me for the first time, so I will share my short testimony... In the past, without having ownership of my faith, I follow my parents' faith and although I went to Sun Moon University, I fell into the things of the secular world, but then at Workshop Heavenly Parent and True Parents have forgiven and loved me as I was and I realized They are my truest Parents and here at Cheon Shim Won able to deep root my faith and begin anew.

Naturally, I eventually resolved for the Cheon Shim Won Spirituality Academy and first Spirituality Workshop and be a part of the Workshop team and was to manage the Academy and offer more and more devotion even lacking in many ways, gratefully to be here.

I would like to share HJ Report in regard to 9th 3-day Workshop... True Father explained about the ansu resonance prayer, a condensation of 40-day, and from the first True Father said that SW already gave us everything that we need, so when we offer devotion and prayer and practice.

And 16,044 members have past... and there are two 12 years olds who spent the time happily with their moms, and as it advanced I was curious about ansu resonance what it is.

True Parents told us how important this condensation Workshop was and every day I offered prayer and looking at it we have one-heart and resonance prayer and all is a focus on prayer and practice and finally it is a Workshop in order to offer devotion for Heaven to work through the trainees, to feel and resonate with Heavenly Parent and True Parents's Heart and communicate.

True Father said you must resonate and inherit the power and authority of Cheonshim and by inheriting, this is the 3-day practice Course to be one with True Mother... And I was able to see trainees desperate heart to ignite the power of the HS and raise spirituality and we were able to see this...

I asked True Father and trainees 'What is your motivation?' and it was to be one with True Mother's Heart... and instead of just staying still, our members have resolved to face the difficulties and problems and revive their own churches and

video

if not one with Heavenly Parent and True Parents, like nature the sprout will not come out... and use this 3-day... through Cheon Shim Won allow us to see the work of miracles...

Please give applause of encouragement

From the first day, I would like to say how much grace it had, from the first opening ceremony, the environment was totally different, and we were able to see how PL offered prayer in tears and as he thought of all the mockery and persecution and criticism and the voice of all the voice to reach Heaven, this is how he blessed this Workshop and the member because of this could spend the opening in tears and shout with passion and we were able to witness this.

Hyong Yon Won, Korean Workshop manager who gave lecture and for the resonance prayer mentioned we were knocking on Heavenly Parent's Heart and as a conversation with Heavenly Parent, maybe we were thinking too difficultly, simply knock on the door and make it difficult... but as soon as knock, the door can be opened, started with simply knocking..when we let Heavenly Parent know that we are here and shout desperately, then Heavenly Parent will open Arms and embrace you...

From Cheonon Grand Church, testimony... able to realize how serious the devotion of True Mother was and truly feel what True Mother meant that we are like as war, for SW to mobilize and found conviction of victory.

another... able to learn the meaning and attitude and significance of resonance prayer, not so much for me and my family but supposed to offer for the Parents as the child, and repented and from now want to offer

that way for Parents and Parents' Will...

Kim Ju Won Director taught us to do calling out prayer and teach us that we must do calling out as we mobilize the SW, and how important SW is and focusing on us... not just calling a name but set a right standard centering on True Father, and only then can we truly mobilize the SW, and can our prayers separate us from evil to meet original self.

testimony...realized my prayer was always external and superficial and from now, I will always remember what the object of the prayer wants and do calling out...

The one who attended before and now, interfering them, said I realized that my desire was to focus my life and live well and be able to tell my parents that I have become this child, and I was comforted and there was grace, and I hope all of you come.

Through Director Kim Ju Won's live testimony, calling out prayer could be effective way...

trainee that offered this Workshop 3 times, and at the special prayer room, tears and sweat covering my body and crying uncontrollably and prayed like that and remember True Parents's Life Course and able to resonate, and it was in prayer that I could feel True Parents came straight down to offer prayer with me and my heart becoming cleansed... and the academy trainees guided and played the drum and the energy was different, and we weren't even able to hear the sound of the drum and they told me that they were offering prayer much more earnestly than before... and with tears and sweat and as we looked at them, the academy trainees were able to resonate with all the prayers and heart together and with gratitude for Daemo nim and the special prayer room...

And new program at 9th Workshop and Hyun Yon mi explained the difference of before that has the more profound experience even only an hour, she introduced the HD method that came from Oh Sun Sok Director... and more and more became familiar with this way and felt Heaven guiding through them..

testimony... worrying the pace was too fast, but when I actually did it, I thought I could be reborn and resurrected and focused only on the Words... able to feel True Parents's Heart and shed tears and amazed that such method existed now.

another... curious about resonance HD and listened well and really loved it and as I read True Parents's Word with a loud voice as if proclaiming the words, not so much intellect to understand but through resonance and sanctification of my heart, and was able to create conviction of transforming surroundings with HD resonance realm...

Next, able to learn about one-heart prayer where many gather to offer, where we have power to go back to the early days, as members listen to each other's circumstances and that each other can be well, offering prayer for that, and compared to other program, members shed a lot of tears more... and why would they hear others' circumstance and cry for them? Because this environment is family to realize... and then if their churches become one with them in this, it can be revived...

Prayer for others and grateful for this education and shed tears and felt love and had hope that the prayers will be accomplished... and involves really listening to others and thinking how this person is daughter of Heavenly Parent, and then my prayer came out well with power of one-heart prayer...

and heard voice, 'Your prayer content will be accomplished, not to worry' Chanyang praise prayer gathering is the highlight of the program, Spiritual Academy to guide this time and offer prayer and praise... able to feel other members' heart who have walked the path and the young 2nd and 3rd gen, if all of us offer praise together, Heaven can really move through us.

testimony... through prayer with melody, able to become one, the power of music, which HyoJN invested in his time and it touched my heart.

A ten-day vigil at the TC is great, but happy for standing in the position of the HJ Praise...

video

True Mother said that the monarchs fly following the path of their parents, although no one taught them, they just follow, and with 1st, 2nd and 3rd gathered to move forward together, we can inherit the life of our Parent, and in order to pay back the love they receive, they could join as coordinators and a life to practice for the Cheon Shim Won resonance

many parents and trainee and parent and trainee... with parent as trainee also... able to empty and have heart of HJ... for the sake of others felt Heavenly Parent being with us and realize the work of True Father, especially with son offering prayer was a precious gift Heaven gave us, and 2nd gen are making

1st gen to become anew...

testimony... about seven years I lived dormant and was able to attend Spiritual Workshop and experience such love, and all possible because my mother offered devotion, and I wanted Mother to also feel that love, and as I saw her offering prayer for those siblings not restored, I realized how a mother's love is the strongest...

testimony... at first many are elders and they have been piling up their devotion and already have a lot of passion, so the spiritual energy was really high and I felt that spiritual atmosphere and different how they resonate, but PL could raise us up, but I could see the pace be one to two hours...

video

mission, responsibility and devotion were the words I framed and referred to it every day and draw how my prayer has been accomplished and with absolute faith and for the members offering with me... and my prayer now doesn't look around for others except to care for them and offering prayer thought about HyoJN and HeungJN and as the person with the physical body to be an extension for them as a person who still has my physical body...

testimony... was able to share the content with a Japanese missionary and at first not everyone could understand well but even now we offer calling out prayer... and I quit my job and went with my daughter and also tithing with Cheonson Gun and youngest son went with members and new happiness came to my family and gratitude and I will go out to the world and testify.

Lastly, she attended 7 times... and not a simple program, but based on one's situation and faith and standard Heavenly Parent is working one by one... every time was refreshing with a lot of grace and through the pure-hearted children, I felt myself purified and realized the essence of the faith is purity, and knowing Heavenly Parent listened to the prayer gave a lot of strength, and now is time to pay back with substantial result, and with the love of staff, able to attend several times, and now instead of just attending I will show myself through the result and testimony...

Through 3-day, everyone had their own way of receiving the grace, and because True Mother is at the DC, our trainees left messages to True Mother...

receiving the grace, and because True Mother is at the DC, our trainees left messages to True Mother...

'Omonim sarang hamnida'

2nd gen become the fire for 1st gen and all be the monarch butterfly...

Praise video

Hoon Dok Hae

Prayer is the greatest battle of all...God prepared excellent educational material thoroughly without omission. We did not know this... Father was the same. In coming to know the truth of restoration and the SW, it was not something He came to know casually. There were times when I prayed for 17 hours without eating anything. Ten or twelve hours was normal. Because of that My knees became hardened. Now even without praying for a long time, communication is immediately because God is close by. There

is such marks left on my knees.

If the truth is not known to all people, then what will happen to the liberation of all people and the liberation of humanity. After praying so much and the discovery and bringing it to light, I realized that everything had already been prepared by God. When I pray, I do so with such strength that pine tree roots are pulled out and boulders roll away.

Even in May and June, I would wear padded pants and would pray until blood and tears were flowing. There were many times when I wrung sweat and tears out of my pants and clothing. Even in circumstances when my waist seemed to melt away and my bones felt crushed and my eyes to understand God's Will, God would come and comfort Me. I engaged in prayer as if gripping the top of the world and gripping the top of the earth.

With all battles, sweat breaks out. With all battles, it is the greatest battles. When Jesus prayed before the cross, He offered sweat and blood. That was battle. It is a greatest battle. Do you know the necessity of prayer? Have you seen the result of prayer? You must have such experiences.

You must have conviction that after you pray, it will surely be fulfilled. After praying, do not keep doubting, thinking, 'Will God really listen?'. If you believe as Father instructed and declared, it will be done. Then it will be done.

HJ Praise

Cheonshim Choir

'Way Maker'

Through Zoom and YouTube

41,000 are gathered...

There are nations who cannot attend this vigil due to the time and they attend the recorded video, and if we include them, the number is greater...

Not everyone came out tonight. There are people working for the assistant team. They came out with the HMH T Shirt, and as they plant their faith deeper than the olive tree, I sure they will endure. When you go to the Jerusalem, the olive tree is still there and like that we should root our faith unchanging.

I met a member from another church where I used to work, and when I feel that the members working so hard stop coming, and I think, 'Wasn't the root of their faith deep enough?' And when you go to Las Vegas, you will see trees broken down because of not having a deep root. How sad to see that. And the opportunity to deepened your root is the Cheon Shim Won and TC WSSs. And those who attend multiple times, can be people of faith very important to Providence.

testimony of hard to work at her job and many difficulties and realized she shouldn't live like this, be like this... very problematic to enter SW with the heart that you should have lived like that. Parents don't let them live like that and retreat and perish. Send them to the Workshop.

No matter how good the job is, if you feel something wrong, you must make a new start. And just as she was very moved to see the other trainees how they prayed with tears, she was very moved. My brothers and sisters, your tears must be shed for the humanity and with heart of parent, sweat for the earth, and they will create an environment that they can live well. Tears should be for humanity. That is what tears are for and they must not be stopped or dry out, and such a church will be revived sooner. And even there's a church where the wood is broken down by the tears to the floor.

Why haven't churches revived, or empty? and I believe there have not been tears for restoration of humity in their prayer. The praise of teears truly revive people's heart. Even HJ testimony, when you give it with tears here, the person in England will receive that grace.

You may resolve to send your child to international Workshop. Because of that desire to resonate with others and go to the Attendance Workshop, they will deep root their faith and one may begin by starting with Spirituality Workshop.

Our sister sent to the Academy, and to be honest, I think she would have made a big mistake to just go straight to her work. Despite that she was with many good people, she thought why am I not working so well, and if she went to the outside job, she could not have revived by the good people to realize are her family actualizing living like that... We have called True Parents our Father and Mother more than our physical parents.

I think my own parents would be sorrowful how many times I call to True Parents as my Father and Mother. We are one family, but we do not experience our life like really having the same Mother and Father and there are many members hurt by the members of the church and roar at the church with anger, and then they cannot come back and shout that. But one must think that they can come back and again.

And even if Father appeared in their dream, they think to go back to a different church. If there have been someone living in your town who has been hurt and not coming back to church, it is your responsibility to go to that person and make them fall apart (which is like tying your neck and dropping yourself into the water. That is why you must offer calling out prayer and devotion.

You should at least have some pork and ask them to come so that you can do the barbecue with them. And that could also bring them to be revived and resurrected.

There are many Philippine members who stopped coming to church after coming to Korea. This week the international department will be doing the service. They will be holding a Christmas party for the Philippine members. I don't know how they did it. But because of that Philippine members were coming to the Christmas Workshop. So, all the churches, invite them and ask them and let them have cake and a party at the church for one of the options to take.

How can you fulfill our name, FF for World Peace and Unification. How to be the community of Heavenly Parent. We must think about that, so that even people of the secular world can give us the sensation that we are brothers and sisters and everything can be accomplished naturally.

If you have a church that gives pain to others and turns their back, then that church will have that pain remaining. The church that cannot survive is the one that gives pain to others.

A pastor might say that, because of so and so, we are in big trouble. You must realize that the central negative spirit is settled down within that church, and you have to liberate that spirit in order not to be judged or accused. So, with great conviction make your move and change your heart.

Our sister said, 'What can I do? I am lacking in many ways. I am the person who makes mistakes, and she has been clinging onto those thoughts, but now her heart has changed,

'How can I give Heavenly Parent's Love to those who are coming to this cafe?' 'How can I make them to feel Heavenly Parent's Love?' Her heart has changed.

In fact not many people were coming to the cafe... but in fact it is doing very well, and selling. This was possible because many people were drawn to them. So, an amazing change has come to her. You must realize before and after you began Cheon Shim Won vigil. Reflect yourself and you will see that Heaven

has given you blessing. And Heaven said, 'This is a precious person. And I need to use this person at Cheonwon Gung Cafe. And if you go, you will be able to see Pagan Mi waiting to share Heavenly Parent and True Parents's Love to you through her baking skills, she will attend you.'

Jojanna shared her testimony, and I feel that it would be good if she could change her name... Her name. Jojanna means 'You have a small heart' and janna means, 'Are you sleeping?' I'm certain that if True Mother hears her name, She will say, 'Change your name.' (Someone is shouting 'Aju' to that)

If you offer devotion, True Father can give you the name. Actually, I was the first one who True Mother changed the name of and after me, other's name. And if people don't offer devotion, they don't deserve that name, and SW will accuse them.

There are many people who have received a new name from True Mother, and I'm sure many other people know that. From the moment you are renamed by True Mother, you must become a completely new person.

So, if someone names 'Saul', then he became 'Paul' and he became a completely new person. Aju? His destiny changed completely. Once you receive a new name, your destiny will change. But if you just change your name, thinking that by having a new name, good things will happen, but then don't set conditions, there won't be any change.

The Republic of Korea. How amazing that country is. That is the name of the chosen people. The literal translation is the 'Country of the People of Great Han'... So, if you don't offer devotion and change, you will set a condition for dark spirit to work through you.

Because one's life is so difficult, one person might offer prayer from their own stance, but from Heaven's viewpoint, that prayer does not reach enough. And that is why our sister lost her faith, feeling that God has not responded and was away from the faith for four years, and it was only her mother's devotion that allowed her to revive after the WSs.

And in order to pay back the grace, she joined Workshop as a coordinator. And how long did it take for her? 400 days. This is God's Providence of restoration through indemnity. If her mother could attend the Workshop, then the time will be less (for the daughter), and she attended the spirituality Workshop. And when the daughter was able to feel True Mother's Heart deeply, she realized how precious our members are.

And she has been recording how many members have attended in the church. And she recorded that only 5 people had come and that church had 500 vigil, but I would have scolded that church. But this person is truly amazing to think of how difficult that would be to offer this much devotion with only 5 people, but how precious are those 5 people... to think only that way.

And one person offering devotion all by themself, how precious is that person and how difficult is the situation they are in? So, if there is a church where vigil is offered by only one person... why don't we give that person an applause...

In the past,

reading True Father's prayer at the SS, 'Please remember pastors. Please offer the witnessor who is offering and taking care of the altar all by themself, and based on how many tears have been shed, that's how much the church will be revived. If tears are shed, that's how much you have to offer devotion behind that. So, if you offer prayer with tears for the nation, for True Mother, Heaven will work through those tears, and righteous people will come out to you. This is amazing. So, please offer prayer, even if it means that you have to pray by yourself. Just offer prayer, even if no one else is praying. You must offer prayer in one heart.'

So, she received truly amazing realization. As she became a coordinator and saw a member desperately praying, asking... She listened to the testimony and realized how much she has been distant with HMH's Heart and shed great tears, 'I'm sorry that I couldn't be more desperate 2nd generation.'

Once she was able to realize how important our Spiritual Workshop is, as we see more and more 2nd gen children come to have elevated heart, we cannot help but to have hope. Aju?

Our sister gave the HJ Report very well on the 9th HJ Spirituality Workshop. She was the captain of the Workshop and able to create the report today. She graduated from Sun Moon University. She was at a position where she could fall into the secular world habit. Because her parents requested her to join the Spirituality Workshop, she joined, and now has been a coordinator many times and become staff at Cheon Shim Won and is working diligently.

Cheon Shim Won prayer Workshop. Do you remember what she said? Do you realize what she said? So, when True Mother was talking about the Cheon Shim Won Providence, True Mother told us to find Heavenly Parent's Heart, find Heaven's Heart. Have experience of it, feeling sorrowful if Heaven feels sorrowful, pounding your chest, pounding the ground with your feet. You must use all your body and heart. That is the occurrence of resonance. So, do not think that prayer is quiet. You must realize how resonance occurs.

So, you must find Cheonshim, 'Oh, this is cheonshim.' You must taste it, in order to keep on developing yourself, in order to be one with cheonshim, develop H's Heart within your heart.

In the past farmers would set a fire on their farm in order to kill unnecessary plants that are interfering with growing their own crops. And we must do like that, burn everything to get all the roots out that are harming our crops. And only then you can make the the grounds useable.

True Parents said that you should organize your field. You should have a good field. So, that is why you must reflect yourself and quickly see where you're at from Heavenly Parent and True Parents's viewpoint.

There is one testimony saying they realized they haven't developed their spirituality yet. So, that person developed her spirituality more and more and more and she was able to enter one-heart prayer with great focus. And through that she received more energy. Heaven's work has unfolded through the prayer.

As one who offers prayer for main message, for chanyang, many people resonate with the words within the chanyang, within the life. We must enter a life of resonance, so even if you a barista at a cafe, you must become one of Cheonshim resonance. So, 'Please eat this and that to feed True Parents.' This is one of the methods for us to truly realize Heaven's Heart within our lives.

So, all the churches must focus on cheonshim resonance with everything. Once you do it, you will realize that Heavenly Parent finally came to me. In the dream, Heaven told me that H will send me the righteous people. And many of our elders met the righteous people through their prayer.

When I was doing witnessing Jesus came down and told me that after 40 days, someone who can give you great power will come to you. So, realizing when it had been 40 days, I waited. And at that time, Pastor Euwan sent me out to practice my witnessing, and as I was touring around to find someone to witness to very well, visiting all the houses, I couldn't meet that person and was thinking to myself, 'Oh, I'm not meeting that person.'

So, as I was walking there was a small house on the corner and i went there and a Mrs came out and said, 'Who are you?' And without thinking I said, 'God has sent me here.' How surprised would she be to hear that? She brought me to her room and asked me to offer prayer for her. And I offered prayer with all my body and heart for her. And I brought her to the SS. Do you believe this or not? Go to the church and ask whether this happened or not. So, such amazing incidents can occur.

The day that Jesus prepared to meet you will come, but you must have absolute faith. If you cannot offer Cheon Shim Won resonance prayer, then attend 3 times, attend 7 times... (as much as you can and increase it... and see what happens...)(missed very end)
