Most Respected Heavenly Parent

Beloved and Victorious True Parents of HEH

...grace and love

You loved the world so much that You sent the OBD, yet, because of our unfilial piety, we have caused such a Mother to walk a lonely and thorny and tearful path alone in a dark, cold, solitary cell for 100 days, a day as a thousand years in tireless devotion, the passing of time feels so cruel that only tears continue to flow. Now that we have Mother's Words, all spiritual Providence must be carried out with perfect devotion at Cheon Shim Won.

Finally the view coming before our eyes, this unfilial child can do nothing but weep for our True Mother.

Yet, even late at night as we bring our weary bodies to participate in Cheon Shim Won devotion, our steps and our hearts feel light and joyful. This is because we feel that True Father is here at Cheon Shim Won and the realm of AGSs are here and the tears and devotion are a source of comfort and protection to True Mother, Who cannot be exchanged for the entire history and we understand a little of True Mother's Heart, yet even though it may cause the satanic realm to marvel, there is a limit to how fully we can attend HMH, our True Mother.

Now at Cheon Shim Won, where True Father is working, we will remove our blemishes and stains and impure influences that restore ourselves and create a situation where True Father and AGS world can be mobilized any time and anywhere and bring miracles. Heavenly Parent please answer us, Father, please work, with our most earnest wish for True Mother's safety and health.

Please protect Her Holy Body and hasten Her release. Please make Her precious Body even more strong.

Kim Ju Han

Testimony

Baeg un bi

eldest daughter... active until a Seunghwa student but then became distant because I disliked the many restrictions I felt it placed on me. Then last year, through an opportunity from Heaven, I entered a 40-day that was like lifetime experience, feeling guilt many times over past mistakes, but as memories from Seunghwa training, I regained course...

I am someone who loves horizontal relations with friends, but during the Spirituality Workshop, I offered devotion through silence, cutting off horizontal relations and was able to deeply feel and experience True Mother's Heart and went to the Overseas Service and did witnessing on Freemont Street in America and 'Please allow us to express Your Heart in such corrupt environment and shed many tears...

After another 40-day, I came to a Subject Centered faith, and even when I returned home, my thoughts returned to Cheonwon Gung...and praying only for True Mother. Despite their own personal circumstances and problems... Who could do this in the world but we Blessed children... Although individuals may be weak, we become great and mighty together and can bring joy to True Mother...

Then devotion at the GWs, with the dream of being a therapist for young children, and I passed at all three places I applied and was preparing for the best place and then saw the Overseas Volunteers and remembered words that America must help Africa and volunteers for that OST, however because of my father's decline and already having a job interest, I delayed... but at the overnight Cheon Shim Won vigil, I heard the report of the Magnolia HJ Hospital and thought, 'This is it' and we went there for my father's surgery that went very well.

The work place personally aligned with my values and it was difficult to give it up, but I called and explained my dream and asked for a postponement, and realized depending on the heart and motive, SW works, and I could join the H Africa Overseas Service Team... I wish to convey to this nation pure and full of love and that even one more child can come back...

### Testimony

Kim Kwon Su

Eldest of 2 sons and 1 daughter... Growing up, I lived with constant fear and anxiety for coming from a Korean and Japanese family. In elementary school, I got teased and took my shoes and urinated in them or openly mocked me with nicknames. I was so heartbroken and during Korean history class, I could hardly raise my head and get looked upon with a sharp gaze, and I grew up hiding it...

My church leader, after military recommended Workshop, but thinking of church WSs I felt a strong diversion due to the image and that it would be a waste of time from working a job and studying my major, but because this church leader was a precious person who came after three years and watching the services be a life stream for 3 years, I eventually decide to go after refusing profusely at first...

The leader at the Workshop encouraged me saying since I was a marine, I could do anything well. Contrary to expectation the Workshop was bright and all were friendly and pure and I wanted to become like them and could come close as not before with people. True Parents walked this path solely for H's Will and in this Golden Age that Mother is still with us, what could I do to help Mother and UPA was recommended and without knowing what it was, I decided to apply with the mindset of starting with small things and do whatever I could.

I created a Cheon Shim Won-like prayer room in my house and offered prayer daily for a month, but it gradually diminished in days and number and decided to enter another Workshop... Since young my mother said to me that she was not my real mother, and I let that pass but now I understood that I did not feel True Mother as my own Mother but just had pity for Her, but watching the trainees cry out for M in prayer, I began to change that She is my real Parent, and thinking about that moment of realization is still tears...

My mother carried a strong religious image, and I believe I could change so much because of her devotion, giving my siblings and me HJ offering papers and asked us to write down our wishes and even in military and when I was sick she prepared offering papers for us and wrote for herself also. Watching my mother take roles at church and difficult tasks, I wanted to learn from her what a life of faith was, not understanding before but achieving 430 ancestor liberations and CheonBo 430 tribe, I regret not helping her more when at her side and now I resolve to help her, not to strive alone...

I participated in the Fifth Attendance Workshop and realized it much more than enduring ones difficulties over individual concern, but it is where children reveal themselves completely without shame and lay everything down, and advancing toward Heavenly Parent and True Parents with absolute obedience is attendance, and the heart that thinks of the other first is attendance not just accomplishing difficult tasks but each day with a heart for others, and not just in special situations, but every day, every moment...

Especially now in the GA I began to seriously contemplate what to do now to bring joy to Heavenly Parent.

Although I knew these things I looked back and saw myself wavering, hesitating to actually practice, which is attendance, and I reflected how I was always centered on me and resolved to let go of that, and have I ever live each day as if it were my last, and why I haven't been able to understand True Mother's Heart until now and live how to practice in daily life.

Thought lacking I will continue to grow and after entering UPA move forward with an attitude of serving the attendees... able to learn the life and attitude not known before at this Cheon Shim Won and lay myself down as if it were a war and practice and attend and communicate HPs, I will dedicate myself fully to this Workshop.

**HJ Report**

O Sun Sok

Director of the FF of H Korea Association

gratitude to all leaders and members

After completing my mission as special missionary for one and a half years appointed as Director... and we often use the expression 'the year of difficulties' but never year as this one... As if seven months were seven years, I would like to report on two days most meaningful...

True Mother's Words: 2025 Oct. 13... You can speak about the Principle of Creation and the Dream of Heavenly Parent and the way to attend is be reborn through True Parents's... You just need to attend Heavenly Parent. This nation must become the central nation and being one family through True Parents can large and small nations alike become one and wars and conflicts can end. We must do our utmost for one human family, and even now over 80 years of age, I live my life attending the Dream of the Creator, and in April 2025 the Creator's Dream of living with True Parents on earth and embracing Heavenly

Parent's children on earth, because I knew this is the Principle of Creation, I resolved to build a Palace in which the Creator can dwell.

(These words were not given at the Cheon Jeong Gung, we all know this). After Father went to Danbury, I made a resolution that something like this never happens again. If anything like this happens to True Parents or True Father, I must protect Them at the cost of my life. Therefore, I decided to become a lawyer so that I could be of help whenever Heaven called, and I studied with that determination. But in senior year at high school, because I was physically weak and fell ill, back and forth to the hospital, my parent said I would not be able to endure the initial exams and opposed me, and even the pastor said that an era may come when judges are no longer needed, so it was still a distant future and in the end I gave up on that dream.

Now that I think about it, I may have lacked competence to become a lawyer, but I never regretted it later, but at the time my heart was devastated as a teenager. Nevertheless, like the words we read and the status reports when we hear them, our Mother even in these circumstances is so admirable and we all have such respect for Her. She continues to testify to Heaven and show an unwavering Presence, and I believe the strength for this for True Father and True Mother comes... I found through the educational programs... but for Them to continue on Their path is that They inherited Heavenly Parent's Heart.

I came to realize this while engaging in 2nd gen education, True Parents's fully inherited and became one with Heavenly Parent. As a missionary traveling throughout the nation, I met and counseled so many members... 1,300 but what I could offer them was limited to a short time, limit to empathy and listening to them... So, a few of these members come to mind and it remains in my mind if they could overcome and what source of strength could I be to them, and thinking of this, I found lecturer Chomo nu lee that I only saw through You Tube and felt I should share it to Japanese members and Ambassadors... for them to have unwavering strength and offered this program and on Sept... when Korean and Japanese parents special education for restoration of faith and family was held.

This was to convey love and professional strength to the missionaries in church after church across the nation, make up a large portion of membership... In this picture, the Main Hall was full. So while touring and counseling these Japanese members and hearing these lectures in Korean, there was a limit, as that was not the Mother tongue and if they could hear in Japanese they might be touched on a deeper level...

So head of the Education Dept of the Bureau already known in Japan and now Korea... focusing lectures on the life of BF's who live attending Heavenly Parent and True Parents.. Spirit and Truth was filling the Program and it was conducted...in the morning ancestor liberation and the Main Hall was filled almost like a GWs, such a time...

500 people came for ancestor Blessing and a spirit and physical world Blessing precious time.. and welcomed Song Yong Chun and his wife and had time to hear their life and prayer... and through the 96th Day we will learn and be able to practice as Heavenly Parent and True Parents desire... The senior couples gave them a great applause.

In the photo the two beside them are the eldest members and it was their 50th Anniversary of the

Blessing, so pretty shocking that it has already been 50 years, and to share love Pres. Chun gave them a gift... So, applause for the Korean, Japanese couples...

And Mrs. Lee An Yok gave an example of an old eagle that break its beak and plucks out its feathers to begin a new life with new beak and feathers... When about 30 years old, a moment of life and death to then live another 50 years... and although we live in a difficult age, we will be able to break out and live a new era of Cheon Il Guk. So, she gave this encouragement to Japanese leaders, and felt we needed to hear like this.

We hear the reflections of this program and the people were actually touched and moved by Pres Song Yong Chun himself and education for couples to become one and form an ideal families what standard to emphasize...

Lecture of Song Tong Ari? then started... and coming in the morning, although everyone might be tired, the lecturers come with eyes wide and great energy, and centering on true love, we learn of the blessings that come with it, and while showing the blessed family seminar in Japan that such could be carried out in the field here. Through Director Chun ul's examples and engaging presentation, it was a listening and joyful atmosphere and he conveyed so that everyone was touched... In the next few months videos will be available and I hope it doesn't remain abstract, but action by BF's.

So, our Japanese and Korean office workers offer so much devotion for these programs day and night and at the Cheon Shim Won team, we had special devotion on the weekends from 10 to 9 and the best choir and prayer leaders so our members gathered devotion and we prayed for the trial of True Mother with earnest together with the staff.

HJ Testimony of Un Chon Wa Chairman and she wanted Blessing with example of her parents, and experience by her parents devotion and love a generation of children who also testify about their parents and children could reach complete Blessing with devotion and love enduring afterward...

In the video expresses how she found out later about her parents' path of faith how precious and valuable it was and if there's one thing my family wants it's to be a Blessed family that respects and lives for each other...

applause for 2nd gen like this...

shouting out and Fight Song of the Will and with resonance praise and it was a graceful time and lastly, the Oeg Monsei of Head of Family Department of Qwonju District and topic of families and conversation with children, he introduced an improving method of communication, dialogue based on the Principle of give-and-take action under the theme of love and offering devotion believing in the results and giving thanks for the result emphasizing that we must always be trusting that H is always guiding and working through prophets... All the participants were parents of children preparing for the Blessing

At the closing ceremony began with Japanese 40-day praise team, pure waters, performing 'Butterfly' which was very touching. For our missionaries who worked so hard until now. Although we had a praise today titled 'Butterfly' here is a video... I was supposed to be the one offering the closing words, but my phone went dead and had to borrow one to finish and was able to take this and the feeling was that Heavenly Parent and True Parents could truly be happy and joyful, and that feeling could not be contained in this video and the Japanese offering praise on the stage I believe will remember that feeling, wanted to share it with you.

This is the people of the Directors of Churches doing many difficult things, and I brought the Choir that sang 'Beautiful Country' but I couldn't borrow a smart phone to film it... each district had it's beautiful memories and I wanted to show you the Spirit and Love of the bright daughters of our Heavenly Parent and they are the sisters and daughter and you cannot tell the difference of their age, everyone looked like they were in their twenties and the saying love is more beautiful than flowers, and sitting with them smiling and laughing was so nice to see and the lecturer could receive so much strength from the audience and even in the waiting room, the green room, I had to come out and I believe the people on Zoom as trying to find their own faces in these pictures, so beautiful faces and I really want to protect the smiles of these Japanese missionaries working so hard in Korea as they age more and that their children inherit these laughs and smiles...

Overall satisfaction was 4.8 from 1 or 2 at first what I experienced it... and what happened was that they misunderstood that 1 or 2 was the highest and we corrected that as reflecting 4.8 average...

Han Ju Wan testimony... standing before Mother's pain, what kind of devotion could I offer, even to clean my home keeping the Place where Mother lives clean and then I felt I must raise my faith again and that it was Heaven's calling and applied for H's education...

testimony... such a long time since I offered devotion at the Main Hall with the best teams of praise and staff... and I felt the grace of Spirit and Truth and I give all my gratitude to them..

testimony... from Cheonbuk Departments... gratitude...Although Japanese who Blessed into Korea and live in that land, I had lost it through the practical difficulties... When the applause did not end, I realized how long they had been waiting for this education and the essence and value of the Blessing and how our lives should change after Entrance, and I had been missing what was missing in the reality, and the education awakens the inner child, feeling return to the time of first faith 45 years ago.

testimony... like embrace of H Mother and how great the grace of Heavenly Parent and True Parents is... and the devotion o the HQ, gratitude for this opportunity...

few males and among them a Korean man's testimony... great senior families and how truly great the years of living only for the Will with cultures and languages different, and able to understand even a little the heart of the great and profound devotion and labor, and Mrs. Yu Jong Hwa testimony moves me to overcome the conflict with my mother with courage to put things into practice and how the long-respected leader put it into practice also genuinely shared... After dedication ender, I traveled to visit my mother and with single resolve to apologize and reconcile without hesitation I shared my heart and felt indescribable sense of relief and she repeatedly said 'Thank you' and more precious by experience the grace of education bearing fruit in my actual life, and this is a homework to be practiced in life.

Most came from one district Chaju and said all participated in the Cheon Shim Won and then came here and participated in the ancestor Blessing on the first day, and applause to them for their burning passion and then there are about 493 testimony and most from this same Province.

testimony... more than 2,000 Blessing candidates and the leader said the hope and registrations were received from all 27 churches and had help with bus and travel... and they sat in the front row and felt the grace and love... hearing 'beloved daughters, you have suffered much and I thank you for enduring so well until now...

testimonies... usually returning home I felt that if I love together with God, it will be conveyed, and then my husband greeted me with big smile and as I became aware of his heart he said, 'Something has

changed' and I continued to practice and listen to the lectures on You Tube and when I had in the past done things on my own, I had my limits, but now living while practicing the words and think about God's Heart looking at me and holding onto God's Heart...

From the first bus to the last at the end n staff providing housing and public bath, my gratitude. And a lot of testimonies expressed gratitude for the staff that made all possible and if we all as substantial beings of Heavenly Parent in this age, we must sharpen our faith that in our families and churches we can all make the culture of true Blessed families, while starting with a small condition, I hope everyone can become people who proudly spread the love of Heavenly Parent and True Parents... applause

**Hoon Dok Hae**

Work while feeling the importance of eternal life and earthly life. Earthly life and life in the SW are not separate from each other. Both are connected, with earthly life the starting point of spirit life, but people today do not understand the concept of eternal life.. thinking only earth life is important. The problem is that unification members do not know that the life they are living now is the educational foundation that guarantees eternal life. Therefore, with the view of Heaven that eternal life begins from now, one must always live on the foundation of the heavenly life that has been established. If one does not know this, one ends up doing other things.

Everything I am doing right now determines the value of the eternal world. These two move facing each other. When the eternal world rises, the spirit world also rises, when the earthly world falls, the spirit world also falls. When one side moves, the other side turns in support. Therefore, one must feel this reality in the present life and live a life that adds pluses to the eternal life--they are not separate. If Heaven and hell are not clearly distinguished, one cannot understand this.

Therefore, one must work while feeling the importance of the eternal life and the eternal (potential of) earthly life. The work does not occur by chance and there is no easy preparation. A person that knows that childhood is a period of preparation for you, has a future. Adulthood is preparation for old age, and a training period in which one goes through a single course of discipline in order to acquire a personality of the great universe.

The eternal beginning does not start when we die but from the moment I come to know the Will. Even for a single moment if there is a leap or a gap created in the flow of time. Eternity is interrupted. Therefore, as we walk the path of our life centering on faith, we must not think, if I cannot go this year I will go next year or the year after.

No matter how good the country one lives in may be, how can a person who does not have a center of victory for one day go to the center of victory and for one day go to enter the eternal world...

'Let Us Go Back to True Parents'

---

### Pres. Lee Gi-seong

Message

gratitude and congratulations

In a few minutes it is the last day of 2025... and reflect and organize your year and write HJ offering papers and with the 1,468th Cheon Shim Won I hope we can face the New Year together...

Because we are having it at the Peace World Center, I believe it has profound meaning and I was offering a prayer of gratitude... and I will offer devotion to start a new year with great hope.

Today the 100th day since Mother has been detained.

Message from a pastor: With this recording in history of 100 days of True Mother at the DC... (names the churches) together about 100 people on this 100th day... In this hardship, do not pray for Me but for you, your families and U family and fulfilling your responsibility... In these unfair trials, resentment and rage can surge, but we must stand up again and offer (forgiveness) and devotion for ourselves (to do better) and for True Mother's release our utmost devotion...

(gives numbers of participants)

Branch Leader Moon Im Pyo came back to Korea after 3 months... and five people from the Service Team with him.... welcoming applause... so today's Oeg Monsei will be led by Branch Leader Moon Im Pyo and I believe it will be huge and loud.

Paeg Un Bi testimony... distant and then 40-day once and twice and coordinator in Spirituality Workshop and now going to Africa as a Academy trainee... And how much must the employer have wanted this employee that he approved the postponement? And experiencing things from around the world I believe will be a great blessing for her as a victorious daughter of God with unwavering faith... applause to witness many people...

(introduces churches)

Mr. Chung Jung Ho was security team at the TC, daughter promised and actually attended 40-day and she was at the center and... I believe she will be great

How great devotion for the security in front of the DC...

This Kam Church is very small and has a beautiful view and near is a big Catholic Church.. and after 3 years of no pastor, there is a pastor now there... and how much grace in such a short time...by that pastor making a suggestion... and with the mindset of a marine, he could see the atmosphere and members so pure... and thinking of the life of faith... always HJ offering papers... and he made his own determination after her... and many say they will walk along side his own mother as well as True Mother...

Attendance is absolute obedience, thinking about others, Heavenly Parent and True Parents daily and practice of taking action of serving rather than centering on himself... and with the mind of a marine, let him be a leader and take care of his spouse and show the preciousness of Workshop... and True Father said the secret is to serve and then you'll be successful and human history will be completed by serving, so not to be satisfied by receiving attendance but attend ourselves.

Director O Jun Sok reported about the special Workshop that 1,972 people... Lecturer Sun Hu, I never heard of him before, but just hearing the laughter and response from the audience, it was astounding revival to this place and encourage the Japanese families at a difficult time...

testimony... No matter what happens, I should listen to my wife... How desperate would True Father have been in the SW to teach Himself, and He would be walking through the lecture hall shouting and telling people to sing, but He talks to the trainees spiritually... He gave these Words Friday:

I want to wail with you in My Embrace, each and every one of you. Each and every member child has unbearable stories and suffering. I cannot listen without tears when I ask them their stories. I want to find them financial aid, and if they have children who are disobedient, I want to educate those children Personally.

These missionaries who came from Japan, I believe they are more patriotic than Koreans themselves. Who would have believed that it was Japanese missionaries and devotion to bring peace on the Korean Peninsula, that by their sacrifice Korean future was able to brighten. The same goes for Philippine and international missionaries.

I went to every single church. In the spirit world, if you just have the courage, you can go anywhere. Who are the central figures in the churches? Most of them are those who give up their own nation and come to the Korean churches and lead. If you asked anyone on the street to do what these people are doing, even if you were to give them money, they refuse. Even if you offer them a lot of money, they will be exhausted within a few weeks.

These people for decades, in a foreign country and language to do what they do, it is not easy. But our Japanese members are wise. They are doing it. Because they realize the Heart of Heaven, to fulfill the Word, above themselves, for the families, for this nation, for the world, they are children who pray. I want to embrace each and every one of them, our missionaries who embrace this path of suffering. When they cannot endure the suffering and they leave My Embrace, I wail unfathomably.

How much they had to sacrifice and how much work they put in for the Providence, and when they leave My Embrace, I wail and pray for them to return. That is why True Mother gave us the Cheon Shim Won. Those who pretend that they don't know, I pity them. I want to sew gifts upon every single child who comes. That is why we have the Cheon Shim Won." Aju?

Through this message, we can feel that True Father is with us. Every church, whether you attend vigil devotion or not, if you look behind you, True Father is always there. With that in mind, I hope you offer your prayers today. And I hope you pray to True Father and invite Him to see how your church is offering prayer saying, 'Please see our churches faith, see how our families are offering devotion.' And this is the age when we must live a life that satisfies the standards of True Father.

And HyoJN gave us this message:

'While facing a new day, let us reflect what life have we lived until now?' It is necessary to reflect, not just one year, but our entire lives. How did we serve Heaven. We can say, 'I made this money. I made this career' Yes, that may be important in life, but if there is a limit, it is that it is all self centered. We must reflect upon our lives with the viewpoint of Heavenly Parent and then making our plans for our future. It is important to receive this part of the Heaven of planning your future.

If you cling on to Heavenly Parent or True Father in the Cheon Shim Won, then offer prayer and ask Them, 'What should I do in the year 2026, the year of the red horse', and how will this world conduct itself, and you will know in the Spirit. And through your prayer you will plan out your future to be of a positive influence to this Providence.

Although in the year, we had many insufficiencies, but through that year you must feel the Love of HF and True Parents. You must be able to feel grateful for the love of True Mother. You can only look forward and move forward once you are grateful. Throughout all my life without the grace of Heavenly Parent and True Parents, you cannot stand where you are standing. And throughout the following year, you must make a determination that your will be reborn as a true child and live for HMM. And this will change the H fortune on the individual level, on the town level and on the world level.

Do you believe? With your belief and your faith I hope you will end this year with your faith and start the next year with your faith. I offer everything to True Mother Who gave me life, and I offer gratefulness."

This is the message of HyoJN. This time along with HyoJN, HeungJN True Father, Daemo nim and all the AGSs... and although in the DC while attending True Mother, I hope it becomes a prayer that fills you with grace. Aju.
