

HJ Heaven and Earth CB Training Center: The Agony We Face Now

Gi Seong Lee

March 11, 2026

Inaccurate Automatic Translation

Good morning to you

I hope you're doing well

The 1518th Tianxin Garden is all night sincere

Summary

From the detention center entering its 171st day, "The agony we face now is a profound test that shakes our faith and the church, but history has always opened a new way in the struggle." This trials and tribulations will make us stand stronger. Just as a seed breaks through the earth and blossoms, so will greater faith and love sprout within us. At this time, I will engrave in my heart the dedication and sacrifice that my true mother showed me, and I will do my best to pass it on. Reported.

As father only said, "Providence never backwards." "Even one step forward is spoken." In the Old Testament era, the Israelite nation fell and entered the captivity of Pavidon, but providence never returned

to the Old Testament era, but moved forward toward the New Testament era, welcoming the Messiah. We too must move forward no matter the difficulties, providence must be my heart's posture that I can walk with a heart full of joy feeling the kingdom of heaven is at hand.

Today's reading is only when your father heads to Danbury, "On this day we shall go forth strong and resolute in the way of the cross, a way of hope and joy. I don't want to see you off in tears. Tears for this country and the world more than your father, ten times, 100 times more. If my heart is painful and sad, when I come out, I must become a unifying force that can unite 1000 and 10,000. "\

When your father went to Danbury, he wanted to follow the Way of the Cross as a way of hope and joy. How mind blowing is this expression. Gentlemen, how confident we are to go before the way of the cross to the way of hope and joy? If you go with that sense of confidence, you believe that no matter what journey you take, your father will soon come to you and serve you in the position of your heart. We are in a painful moment, but if we resolve as a unifying force by making a thousand into one and a million into one when we conquer our challenges, providence will open up the way for us to look forward to hope and move forward without retreating backwards.

Proof of a trainee: After being discharged from the army, his heart became hard and thought he couldn't continue like this, so he decided to join the training session for 40 days. Even though many people come to the training session, as soon as they said, "True father and mother," from the praise of the first day they participated, they burst into tears and experienced a strange experience. It was indeed the role of Heavenly Parents. Resonating with the sentiment of my true mother, I will work hard with the goal of becoming the one who embodies the sentiment of a mother who tries to search for a single needle in the

desert. From now on, I decided to become a history teacher who teaches the elected people of the Han race, and work hard to become a child who will walk towards a unified Korea.

Knowing the feelings of Heavenly Parents is not easy. After the fall of man, until the Messiah came to this earth, there was only Jesus Christ who knew the heart of Heavenly Father and Mother. However, these days, the second generations of Shikuchi are feeling the sentiments of Heavenly Parents, resonating with them and spending time resonating. This is the most strange thing in human history. As long as there are such men, His will will be accomplished. Gazing upon the second generation, we and the whole world must be conceived to be in such a position.

Kun-doku no Mikoto (True Paternity Sutra P.405): "What makes you move towards the last place of ideology is the mood." My mood ultimately determines everything about me. Those who grasp the heart of Heavenly Father and seek carefully, can hear heavenly voices, can see illusions, and can analyze every actual situation in life. If there are young men and women who move searching for new ideologies while feeling the responsibility they have given them, suppressing their worried and anxious minds, and hearing their crying voices, you will feel everything historical and everything they have felt for a long time through their feelings. Feeling the feeling, awakening the self, was this the main subject of the ideology that heaven was looking for? Only those who have a moment to cry out unknowingly, wondering if this is the true image that the world has been looking for, the form that it can be proud of before heaven and earth, are masters of history, masters of providence, and masters of heaven. "\

Proof of spiritual trainees: No matter how loud I shouted, my biggest challenge was not being able to feel the spirit of heaven. When I prayed a prayer that entered her's feelings, "If my mother's return to the palace, it's okay if my depression and panic attacks don't get cured," she became completely united with her feelings, and when I was inside her, and the place became invisible, the historical background that caused her panic attacks would be instantly sorted out. We are told to give up our desire to walk the path of training, but the most important thing we practice is the practice of awfulness. If you enter into the feelings of your parents and become one, you will be surprised, and you will be able to solve what you couldn't solve.

Even if the church is dissolved now, and we do our best at home instead of entering the church, if we experience that heaven is to be fully among the fathers and the fathers, then we will have a new role. May this be a night of great revival.
