

## A leaflet of introduction for Home Church Project

Ali Mahjoub  
September 27, 2015

Dear Reader,

Allow me to introduce myself.

I am Ali Mahjoub, born and raised in a large humble Muslim family in Tunisia, North Africa. By the grace of God, I was led by a chain of prophetic dreams to meet the Unification Movement in America in 1981 and I became a member ever since. In the 1980s Reverend Sun Myung Moon, founder of the Unification Church, began the NCCAS, (Notional Council for Churches and Social Action Service) a none profit organization geared to helping the elderly and needy people, working with Christian ministers and other faith leaders. The organization expended to "Home Church" project where members adopted an area of 360 homes to work on as representatives. My wife Cynthia and I are happy to represent and assist you and bring you the good news. Our hope is to visit with you and share with you God's love and truth. I am an author of two books, Honor Thy God 2010 and Jerusalem Appointment with Destiny 2015, and presently working on my third. I hope we can be of great help and blessing to you.

Friends.

Our world, undoubtedly, has entered an unprecedented period of human history, one that can be described in religious terms as "The Messianic Era."

Signs of the imminent return of Christ have been amassing since the turn of the 20th century. Especially after World Wars I and II, we have entered into an unprecedented new messianic era. There have been more prophecies fulfilled in the 20th century than during any other time in Christian history. One of the greatest biblical prophecies was made by Jesus in Matt. 24:32-34. It was fulfilled in 1948 when the Jewish people returned to their Holy Land.

As one great psychologist, Karagula, puts it "The twentieth century has been designated as the "Age of Breakthroughs." We have broken through the tight structure of the atom, we have broken the sound barrier, we have broken the earth's gravitational pull and man has walked on the moon."

Yet, we have moved through the twentieth century so completely enamored by man's scientific discoveries that we paid little attention to our perspective on the avalanche of religious and spiritual phenomena, such as ESP, dreams and other Psychic phenomena that are taking place in parallel to the rapid scientific discoveries of the twentieth century.

We must make a new evaluation of man's spiritual and religious potential and we must take into consideration aspects of biblical prophecies of which we may have been totally unaware of or deliberately pushed them aside; and that perhaps our spiritual senses developed to such high level, that the need for higher expression truth is necessary.

Let us not be too occupied with religious strife and political correctness and not recognize God's work in these amazing religious and scientific rapid phenomena of our time and ask, what if our present time is the messianic era prophesied to come? What if God had sent new religious truth to mankind that can work hand in hand with science that can usher God's new Kingdom on Earth as it is in Heaven like in Jesus' uttered Lord Prayer.

If God led you to read this message please write us a note. God Bless!
