

Divine Principle Lecture

„2012 –End of the World or New Beginning?“

Vienna, Austria, 13. September 2012

This was the topic for two evenings. Mr. Stampf spoke about the different ways how to view history: from a religious or from a materialistic viewpoint, or from the viewpoint of evolution. He compared these views with Unification philosophy, which states that history is the history of fallen men, which has to come to an end. It will come to an end through the power of the Principle and the power of love. He explained then that today we are at the brink of a new age. We need a spiritual change, not natural disasters.

A sister who had not been her for 15 years (middle) came - 2nd gen members attending – group discussion
