

Ukraine Trainees Receive a Taste of Farm Life

Mykhailo Ilin - September 1-3, 2019

From September 1 to 3, New Hope Farm in Ukraine hosted 21 participants of the New World Educational Team. We try to organize such meetings for the members of this one-year educational program two to three times per year.

The goal of the meeting is to give our young potential members a deep understanding of a life of faith and inspire them to continue the program, as well as to listen to their questions and problems.

The program consisted of Formula Course lectures, practical guidance, questions and answers, discussions, as well as testimonies of those who recently graduated from the one-year program successfully.

This was the first time we held this meeting at the New Hope Farm. It gave a special taste to the meeting. The participants could experience working on the land, watering plants, as well as building a fence around the farm building.

There were also sports competitions, games, songs and lots of communication. Blessed wives invested in cooking for the participants.

The NWET members went back to their front-line programs after the meeting with a refreshed spirit and determination to study harder and invest in their spiritual growth.
