

Romania CARP Activity

Romania, Bucharest, Bong Moon Jeong, January 16-26, 2018

Greetings from Romania!

Purity Education for New Guests

We are so grateful to offer this report for Heavenly Parent and True Parents. Since we started JeonDo activities in 2018 we organized first Purity Education Event last week. It was really nice to meeting again our guests, young people who has desire to create beautiful family in the future and prepare for this.

This time the topic was about True Love! Because we all want to have beautiful relationship in the future centered on True Love. But many times young people are confused about concept of True Love and how they can find this kind of love in their life. So first we had presentation about 'What is True Love?' and we made clear understanding about this. True Love is pure and sincere love towards others which doesn't expect to come back something when you give. And also love which you give and give and forget about you gave. And after wards we had one exercise to make a 'Gift List' for our future spouse. Thinking about our future spouse and writing down what we can give as gifts. And It was really interesting experiment that let us to think about our future and what can be our True Love for him or her. And the conclusion was 'the best gift for your future spouse is you!' So we need to try to become best version of ourselves so when you meet our future spouse we can give real love, True Love!

It was really beautiful time together to think about our future family, future spouse. And also it was meaning time to realise that actually creating beautiful family and relationship in the future is starting from me, ourselves. We need to start prepare for our future family. We will continue our educational events for Romanian young people to let them know about importance of family and preparation for future family!

Open HDH Discussion

We want to start this report by offering our heart of gratitude for Heavenly Parents and True Parents for being able to organize this event. We are really happy to see young people that are searching for new ways to grow and develop their character. This is one of the reasons why we organize this Friday event, to inspire them to think more deeply about their life and ask themselves more fundamental questions and see different perspectives.

This Friday was the first Open HDH meeting for this year, so we thought that this is a good opportunity to discuss about how to set up goals in our life and encourage the participants to think more seriously on that they want to achieve this year. We read together a paragraph from True Father's Autobiography from the section "Find your purpose, change your life" and then we made two groups and shared about what inspired us from the text and what is our opinion. As True Father always thought us, is very important to have a goal for what we live and this goal to be centered on something higher, that can bring a benefit for the others. So, we tried to guide our guests in this way in our discussions and encourage them to dream big.

We also did an exercise and asked them to set up at least one goal for this year, write it down, then think about what would be the benefit if they achieve this goal, what kind of obstacles might appear and stop them on the way and also make an action plan in order to overcome this obstacle. Was very inspiring to discuss about this and hear from each person their wishes and desires for this

year, what are their fears and try to find together ways how to overcome them. Most of the people shared that they want to become better people, more mature and stable emotionally and be a better example and support for the others.

Our conclusions were that we need a lot of patience in order to fulfill our goals and that we have to always trust God and persevere in our trying to become better and in the end surely, we can bring good results.

The atmosphere was good and exciting and we were happy to have this chance to participate in this event. We hope that each person can really achieve their goals for this year. Aju! Thank you!

1 Day Divine Principle Seminar

We organized first 1 Day Divine Principle Workshop in 2018! We established 21Days JeongSung Condition period for JeonDo and We are trying to meet new young people to invite them for our activities. We were so grateful that we could organize this workshop even though all the students are in the exam period and it was not so easy to find people.

We started this workshop with joyful singing to make good atmosphere. Divine Principle lectures were organized by order 'Principle of Creation' 'Human Fall section 1' and 'Principles of Restoration'. Each lecturer gave 30 minutes of lecture and after wards we made pair and had discussion centered on questions. Through Divine Principle lectures we could understand basic principles and through discussion we could connect better with our daily life.

After the Divine Principle lectures we had lunch together which prepared by our Active CARP members. And we had time called 'Happy Day' organized by also one of Active CARP member. It was really nice time to share together as brothers and sisters centered on Heavenly Parent. During the 'Happy Day' time we could understand each other better through games and sharing.

We just started our JeonDo activities in this year. But we are sure that if we put our JeongSung we can meet beautiful young people who are prepared by Heavenly Parent. And we are sure that if we create harmony and unity and work together with our Active CARP members, we can bring successful year and bring victory for Heavenly Parent and True Parents! So we will continue our activities with hopeful heart and new determination! We will the hope for Heavenly Parent and True Parents!

CARP Meeting

Our last meeting with CARP members was centered on True Father's speech to young people about the power and vision youth must exert in the society.

Rather than focusing on just individual purpose, how True Father guides us is to be global citizens taking responsibility both locally and globally for our generation's results. After reading the text and finding the inspiration to guide our new week, we shared about what we feel our responsibility is centered on God's will for young people.

We are aware that our purpose and vision is to dream big and live for the greater good. If we can keep this attitude starting from Youth we will definitely influence and improve our everyday circumstances.

The change in the world starts with individuals taking responsibility for their own lives and together with CARP members we wish to start taking responsibility for our lives and become true youth and subjects of true love for the others.

Open Purity Education

This time we discussed about differences between man and woman.

In the beginning we shared our experiences about differences between man and woman from our family or friends. It was really interesting sharing that we could see all of us experienced and sometimes had difficulties about differences between man and woman. After sharing we had one presentation about this topic. Through presentation we could see what the difference is and how we can understand each other. The difference between man and woman are the special gift from our Creator, Heavenly Parent in order to create unity through True Love. So we need to understand and accept the difference and create unity through True Love. At the conclusion lecturer shared about importance of being mature person. In order to give True Love for future spouse you need to have mature character. So in the end we shared how we can mature ourselves in our daily life.

It was really beautiful time together to think about our future family, future spouse. And also it was meaning time to realize that actually creating beautiful family and relationship in the future is starting from me, ourselves. We need to start prepare for our future relationship from now. We will continue our educational events for Romanian young people to let them know about importance of family and preparation for future family!

The way to mature in human life

We could successfully organizing new type of event for guiding Romanian young people on our Friday evening weekly meetings.

With the support of our national leader, Mister Jeong Bong Moon , we prepared new kind of lecture, SES Me Leadership Tour, meant to inspire and motivate young people to apply the Principle in their life in a more practical way.

These new series of lectures that our national leader will present on Friday evenings every two weeks, take on the real struggles that youth deals with nowadays: depression, low self-confidence, inability to find true purpose and value, creating good relationships and finding God in our life.

The meeting started with introducing our national leader to the people attending the lecture, followed by the lecture on how to find ourselves and our way on this trip that we call life.

With parental heart and excitement in his voice, mister Jeong Bong Moon shared with the audience what stages we go through in our life, how to recognize the situation we are currently in and how to build the right attitude and mindset to overcome our limitations. Also shared stories from his life experience and he emphasized the importance of feeding ourselves with spiritual food in order to stay motivated, and keep going.

After the 30 minutes lecture, we had Questions & Answers session. Our guests could openly ask questions and find out answers for their struggles or misunderstandings.

The young people attending the lecture shared how useful and inspiring the lecture was and expressed their wish and curiosity to attend the next lectures and sessions of open discussions.

Marcel, 24 - It was really inspiring and I will try to apply the system that we talked about today. I am aware of how much I need to focus on “eating” good food in my life and keep a positive attitude in any circumstance. It is not often that we get to discuss about such major things like today’s lecture.

Mihaela, 25 – I wanted to ask so many questions! This was a very good opportunity to ask directly about what concerned me and I liked mister Jeong’s style of lecture.

The meeting ended with sharing opinions about the lecture and taking a group photo.

We are very grateful to be able to organize this SES Me Leadership Tour meeting and we hope that our object partners can open their heart and mind to be able to apply these teachings in their life.
