

SES Me Leadership Tour

Romania, Bucharest, Bong Moon Jeong, May 18, 2018

Together with our members and the Europe STF team, we are offering a JeonDo JungSung condition, trying in different ways to spread True Parents' words and traditions among the young people.

One of our events, that we organize it every two weeks, is the program SES Me Leadership Tour, a series of seminars presented by our national leader, Mr Jeong BongMoon. The purpose is to guide the young people to live a meaningful life, centered on true love, by practicing the Divine Principle. This is an open event, not only for members, but also new guests can participate, so the content is lighter, the lecturer using practical guidance for life and examples from the daily life.

The topic from last week was about our original value and purpose. The main idea was that each one of us are special and that we all have an original value and purpose, our own "color", but unfortunately, many times we cannot recognize it and we just "loose" ourselves by comparing with the others and becoming frustrated that we are not like them. So the lecturer advise us to reflect deeper about ourselves and find our own value and don't just have expectations from the others to approve us or recognize us, but be owners of our own lives.

The presentation was very inspiring, and the atmosphere was open, at the end of the presentation we also had

time for discussion, the guests could ask questions about the presented topic. It was a good time to reflect about our life and find some inspiration.
