

Celebrating Children's Day

Romania, Bong Moon Jeong, June 2, 2018

On the second day of June, Romania CARP celebrated National Children's Day by initiating a meeting between volunteers and children from one social care center.

As it already became a tradition, this year as well we wanted to celebrate the wonder of being a child by offering our time to help young people have a precious day.

We mobilized CARP members, Romanian students and Sun Moon students to offer our loving heart for the children with less fortunate circumstances.

We prepared friendship bracelets together; we decided on games and even prepared short artistic moment for the children.

The time that we spent together was short but we did our best to have a good time.

The children were happy to be face-painted as their favorite superheroes, we played football and many games and together with Sun Moon students we could offer dance for them.
