

God's Love Is Topic of Open HDH

Bong Moon Jeong - September 27, 2019

The third Open HDH event in this semester that Romanian members held for new guests and CARP members took place on September 27. The atmosphere was very positive because the Romanian young people were full of hope and positive energy!

The event started with introducing ourselves. Afterward we made three teams to read Hoon Dok Hwe material and then have a discussion centered on the reading.

The reading, from Cheon Seong Gyung, consisted of True Father's explanation that "the reason God created the universe is because of love." Through our discussion we could understand that no matter what kind of faith we have, God is always with us to give us love, life and energy. So we need to make efforts in our everyday life to feel God and live together with Him.

Then a representative from each team reported on their discussion, and we were so happy to hear that they understood how important it is to put effort into making a relationship with Heavenly Parent! We will continue these discussions of Principle with Romanian young people, so that they can be the hope for Heavenly Parent and True Parents!
