

## **King Sejong and the Internet!**

Douglas Moriarty  
April 11, 2013

### **Dear FFWPU Community,**

**These thoughts are offered to help bring Victory for True Mother's Vision of 2020 and in recognition of her profound appeal to China of "Trees for Peace".**

**"Right now our health is threatened by the yellow dust and fine dust blowing in from China. All our lives are threatened. I want to say something to China:**

**What do you think would happen if we just did what the bible says? We are wasting billions of dollars on the military, but if we were to use one third of that money to fertilize 30 percent of the land that is now desert the people of China would find a new way to live and the nation would become rich. There are so many reasons why we need to reveal the truth. The truth is that the True Parents that God and humankind hoped for have already arrived. All the nations should unite with True Parents as sibling nations and establish the culture of heart of loving and taking care of each other. When nations can do this, world peace will be possible. In this way, we can live in the eternal Heaven."**

**Dr. Hak Ja Han Moon, December 15<sup>th</sup>, 2013, World Leaders Convention, Korea**

All media outlets TV, radio, movies, newspapers have failed the providence in the time of True Father on this earth; yet it is the Internet that so far has not been able to be destroyed or absolutely controlled. Yes, much internet pollution is around but if you want cutting edge information and for truth to travel far and wide this internet medium is God's gift to mankind.

## **King Sejong and the Internet!**

April 11<sup>th</sup>, 2013

To start with and by example of all that can be found on the internet; I forward to you the website address for a 48 minute documentary called '**Green Gold**'.

**This is about an existing method that offsets Carbon by working with nature and not against nature. Vast areas of land have already been restored to bring livelihood to 20,000,000 Chinese now living in formerly uninhabitable lands.**

This success is being adopted in Ethiopia so that the future of Cairo, Egypt's water supply from the Nile, can be maintained with high quality. Then again; it is now working in Bolivia, Jordan and Rwanda. We are living at a time when all of mankind will be pondering the best way to solve a myriad of environmental problems. The solution will most likely come from the ground up (restoring deserts) so to speak and not from the top down. ( with huge wind farms)

Therefore:

#1 individual responsibility to care for and love the environment that one uses will need to be emphasized properly and clearly enough to inspire people with hope of a better world; not fear of the loss of the world we already have.

#2 Working in all areas with nature and not work against nature is of the utmost importance. For example 'fission' nuclear power is unstable, unnatural and destructive; whereas 'fusion' nuclear power is stable, the same power generation method of our Sun and all stars and is basically harmonic and soon technologically attainable.

Politically speaking, in the course of the past 3 or 4 generations we have seen power shifts go from absolute monarchy to parliamentary monarchy, in some cases dictatorships then mostly to democracy.

**My meaning is to highlight that centralized power is coming to an end and the empowerment of humanity at large is on the rise.**

**It is the same with energy production.** The absolute control that the energy power brokers like J.P. Morgan had at the beginning of the past century is now being **moved to the masses of humanity that will be able to go off the grid (BLOOM ENERGY for only 1 example)** and produce energy for themselves with new sustainable technologies.

We are not living in a truly democratic state either; the best way to describe it at this time is a **Corporatocracy**; where these soulless business' act like drunken sailors loaded with cash going about making prostitutes of our political representatives with their cash and charms. Real democracy is failing, polarized and controlled by fighting factions. Still Corporatocracy we can believe will be a short lived experience of history because of its inherent weakness' that has done a lot of damage to human culture because it is **singularly driven by profit motive and not service to others under fair economic terms.** Vast advertising hides many truths and if it were not for the advent of internet technology there would be much less hope for the immediate Providence of True Parents and the coming Kingdom of God on this Earth.

The internet is not controllable and although it can be misused; it cannot be stopped. **We are actually watching the unfolding and empowerment of all peoples, places and things through the discussions now going on in cyberspace.** We need to step up and be there for this debate or at least be alongside of others who are on the right side of

history. I believe it needs for our FFWPU community to **be involved in more discussion among ourselves who are concerned about various issues; as Blessed Families we can stay at home , use SKYPE and create for the Church a library of literature to inspire the world and help people understand Heavenly Vision.** At this time; who knows that True Father has said Hydrogen from the oceans will be the world's energy source and that it will be cheap, helping the world to solve many of its current problems. We can actually research and create literature proving that to be possible and thereby fight hopelessness and confusion created by satanic forces. True Father's words are liberating but people need to understand how they can be applied to solve problems for this world that they are interested in. We are living in the time of the restoration of the 3<sup>rd</sup> blessing; people need to have their bread and butter issues which dominate their concerns to be addressed. In time they can thank us for our insights and finally want to learn more about the 1<sup>st</sup> and 2<sup>nd</sup> blessing.

Here is a little story for you: There was once a great King (**King Sejong of Korea**) who saw his country writhing in suffering and without relief or ability to understand their circumstances. After pondering the situation for many years he called forth his entire cabinet of ministers and asked them this question:

**“Who is the most powerful man in our entire nation?”**

They all jumped to answer his question with, “that you are or it is at least some other great figure of the nation” and then after exhausting themselves the King said “you are all wrong”. With that he told them who was the most powerful man in all the Kingdom. He said

**“the most powerful man in all the Kingdom is THE COMMON MAN”**

and with that he ordered; that all would be taught to read, to study, to think; to think for themselves and for the sake of others what is best to do in every situation.

Soon all the formerly neglected, areas of the Kingdom were thriving with activity and happiness!

Today The Common Man Has been given the Internet; that all would be able to access knowledge, to think; to think for themselves and for the sake of others what is best to do in every situation; centered on True Love.

Sincerely,  
Douglas Moriarty

( After due diligence the fruits of the work and concern accomplished by blessed families together can be incorporated vertically into our structure as a means of support to this structure and strengthening of its appeal to others.)

**An example of something on the internet, done by others; that can enrich our belief in a better world coming:**

**Green Gold** filmed/ produced by John D. Liu [topdocumentaryfilms.com/green-gold/](http://topdocumentaryfilms.com/green-gold/)  
Its about planet-wide redevelopment of devastated ecosystems. The world's greatest deserts were once abundant with life; what happened? "These deserts can be returned to the same abundance in a very short time."

Environmental filmmaker John D. Liu documents large-scale ecosystem restoration projects in China, Africa, South America and the Middle East, highlighting the enormous benefits to people and planet of undertaking these efforts globally.

The film takes you to China, Jordan, Ethiopia, Rwanda and Bolivia, and features the PRI's own Geoff Lawton, who adds impetus and technical know-how to John's impressive toolbox.

**It's the story of healing landscapes at scale, and, with it, restoring life, livelihoods, security and a future. This documentary is not just a tale of hope, it's evidence of hope – it's proof that we do not need to give in to apathy and despair. Instead, we see we have the simple solutions right in front of us. Watch the full documentary now - 48 Minutes**

ADDENDUM OF recommended to SEE FILMS regarding the new power of internet and also offsetting Carbon:

\*Have you heard of Thorium- Liquid Nuclear fuel that cannot meltdown into explosion and is almost everywhere.

[topdocumentaryfilms.com/thorium-dream/http://topdocumentaryfilms.com/thorium-dream/](http://topdocumentaryfilms.com/thorium-dream/http://topdocumentaryfilms.com/thorium-dream/)

\*Steve Jobs / 1984 /Advent of Apple Computer

[topdocumentaryfilms.com/steve-jobs-billion-dollar-hippy/](http://topdocumentaryfilms.com/steve-jobs-billion-dollar-hippy/)

\*Who is Peter Joseph / Zeitgeist Movement (A Socratic type in regards to spirituality; reactionary with concern to God/Religion and actually is a bit of an enigma. Nevertheless he has saddled the internet in an explosive charge forward and indictment of financial corruption between banks, corporations and Parliaments)

[topdocumentaryfilms.com/who-is-peter-joseph/](http://topdocumentaryfilms.com/who-is-peter-joseph/)\*

The Virtual Revolution | Watch Free Documentary Online

Twenty years on from the invention of the World Wide Web, Dr Aleks Krotoski looks at how it is reshaping almost every aspect of our lives. Joined by some.
