

## **Group prayer conference call for Caroline Patton medical custody court case**

Jim Boothby  
October 30, 2018

**Please, join us on a Group Prayer Conference Call at 10 am.. today.. Wed, to protect young Caroline Patton from being literally taken away legally, forcibly, by the State of VA from her parents Ernest and Keiko in their medical custody battle. Call into 712 775 7031, Access code ... 330 190 356 # .....to Join the call led by Pastor Jim. Please see the below explanation and payer points written by Jongsook Moon**

**Pray for the Patton Family  
Tomorrow, October 31 - 10:30 AM  
As they are called to court again  
to protect Caroline from Child Protective Services**

**Court starts at 10:30 AM Wednesday.** We don't know how long it is scheduled to last, so **please pray as long, or as often, as possible from 10:30 to noon, or until we have received word the case is finished.**

Hopefully, this will be the last time they must defend their right, as parents, to determine the best medical treatment for their daughter, Caroline.

Today, Pastor Patton said, "yesterday we found out that CPS plans to humiliate Caroline on the stand by contending that she is incapable of understanding medical treatment options and therefore, the State must be responsible for her medical care."

- Pray the judge will not even allow CPS to call Caroline to the stand.
- Pray for the judge to be in tune with his good spirit world and to follow his God-given intuition to determine that the parents have the right to determine the medical treatment for Caroline.
- Pray for judge's good angels to surround him with love and positive energy.
- Pray for the defense attorney's for the Patton family to be wise and strong in their defense.
- Pray for Caroline to be surrounded by her angels and good spirit world and to come away from this experience with strength and determination to live a productive and heavenly life centered on our Heavenly Parent.

**An email will be sent as soon as we hear the court session has finished and if any result has been reached**
