

## **FFWPU USA: A Movement Awakens**

Demian Dunkley  
December 2024  
National Leader, FFWPU USA

Dear Brothers and Sisters, Greetings from the heart of the American movement! True Mother's love is transforming America, and I am grateful for the miracles we witness daily.

From coast to coast, we see lives changing under the banner of 'God's Dream, One Family'. With over 70 Cheon Shim Wons established across the country, members are offering heartfelt prayers to True Father morning and night, united in their determination to help True Mother fulfill her vision. This has sparked a profound cultural shift, aligning leaders, youth, and families with Heaven's providence.

### **Rooted in Unity and Purpose**

We are activating the church to witness through the Peace Starts With Me movement. This message resonates deeply: true peace begins within us, extends to our families, and transforms communities.

The 10 strategic communities, responsible for 85% of America's growth results, are brimming with energy. At our recent summit in San Antonio, leaders reflected an unprecedented spirit of unity.

As Rev. Kevin Thompson shared, "The spiritual environment in America has changed. For the first time in my 50 years of church membership, I see a great breakthrough in witnessing. I haven't seen anything like this since the 1970s. It is a miracle. Witnessing about God's Only Begotten Daughter is much easier and is being received much more than our previous efforts. Thank you, True Mother!"

This unity is also evident in our 21-day campaigns, which bring the spirit of renewal to every community. Over 550 new members have joined in the past four months, each a testament to the transformative power of True Mother's love.

### **The Pure Water Generation Will Grow our Church**

True Mother has called us to activate the spirit of our youth through music and praise. Across America, Holy Spirit Masterclasses are inspiring young people to find their voices and share their hearts.

One participant shared, "I realized how important it is to feel proud of True Mother. Through singing, I found the courage to embrace my faith and share it openly." Another expressed, "Each note was an offering of gratitude, and I felt the Holy Spirit moving through me, healing parts of my heart I didn't even know were broken."

Sefako, a new member, reflected, "As I sat down in church, I felt the full weight of the Holy Spirit's presence. It was a confirmation that God's love is truly here. I am so grateful to be part of the movement True Parents started."

### **A Culture of Homecoming**

Our national services in New Jersey, Los Angeles, and Washington, D.C., shared the theme of homecoming, inviting all members - new and returning - to reconnect with True Parents.

One returning member shared, "A long time ago, I grew distant from the church. But over time, and with the love and support of my family and community, I found my way back. True Parents' love for us is sincere, like someone who deeply cares for my heart and soul."

Another member, who had been away for a decade, shared, "After attending two evening programs, I felt inspired. For the first time, I approached our pastor to offer my help for the ministry."

At each stop, we witness the power of True Mother's conditions to purify and uplift. For members, this means stepping deeply into God's embrace and letting go of burdens. It is also an invitation for those who have felt challenged in their faith to come home.

### **The Road Ahead**

True Mother's vision of a Heavenly America inspires us to build on decades of True Parents' investment and the support of members worldwide. Thank you, True Mother. Let America be a nation that brings joy to Heaven and hope to the world.
