The Settlement Project was founded in 2020 in response to the extreme measures of control implemented by nation states in response to COVID-19. Lockdowns forced children to learn from home and consequently enabled parents to recognize that their children's curriculum included concepts they did not support such as DEI and the encouragement of what is called "gender fluidity." WICC (Woke Ideology Critique and Counter Proposal) was developed by the Settlement Project to provide incisive analysis and a compelling counterproposal to arrest and reverse destructive trends in the US and other free nations. It demonstrates how ideological divisions have been overcome historically and provides a blueprint that people of faith and conscience can utilize to rebuild a healthy and moral culture.
