To seek peace and co-prosperity on the Korean Peninsula and in the Asia-Pacific region may seem like a mirage. The Republic of Korea President is impeached and new elections are scheduled for June. Nevertheless, speeches from both sides of the aisle in the ROK National Assembly welcomed the International Association of Parliamentarians for Peace (IAPP) and some 40 speakers from various legislatures around the globe on April 12, 2025. Both hope and pain were palpable as the politicians from nations with traumatic pasts spanning Cambodia to Congo expressed their most fervent desires to bring home divine peace, while signing the World Summit 2025 Peace Declaration. Kindly join the discussion of this fresh development in manifesting heaven on earth for our diverse human family.
