

Change of Paradigm- from chaos to new creation

Seminar with Rainer Fuchs

Oslo, Norway, 6. – 7. September 2014

Before F-day we organized a seminar with Rainer Fuchs to prepare members for F-Day. Now, one and a half year after F-Day many of us are searching for the best way to respond to the new era that came with F-Day.

We invited Rainer to lecture on this topic. Through five lectures he covered topics related to F-Day, the Constitution, Kingdom building and Tribal Messiahship. Altogether around 30 members participated, some partially and others in the full two day program.

Rainer said the time before FD was a time to repair historical problems; a time of recreation, while the time after F-day is a time of creation. Recreation is more difficult than creation. Now the path to CIG is open, now we are building the house.

Some might have thought that F-Day would bring more changes in the world. However F-Day was also called the D-Day and as we remember this was not the end of the war; it was only the beginning of the end.

F-Day was the day when all the responsibilities of the Messiah was fulfilled. In particular it was the day when one man and one woman became 100% united with God. The trinity was established. This is the victory that eventually will bring in the kingdom of heaven.

Yet, both salvation and creation goes gradually. Our movement is like a «little world» and we have to solve similar problems that we see in the world. The problems we solve, we solve for the world. Even if the history of Adam and Eve is restored, we have to solve and restore things in our own lives.

All the terrible things that Satan planted in history is coming out now. But we have the solution to solve all these problems; do hdh, teach dp, be a happy couple.

Speak good of all, keep a good nature and there will be much space in us for a blessing. Become selfless and live for others. These are some of the guidelines that were mentioned.

Step by step the new world will be built.

Rainer spoke of the significance of the Constitution. He emphasised that it is important for several reasons: in order to secure our HP as the center, in order to build the substantial CIG the earth, to set a standard for how to relate to each other, to secure transparency and systematization (to develop a system we can rely on).

Kingdom building means to go from the «I»-world to the «you»-world. Only to follow TF is not enough,

each one must create our own heaven. Take the weeds out and plant the new seeds. Adopt the mindset of God in everyday life, and make it a habit.

TF wants to change the thinking of the people. Everything starts with the thinking, after that comes the emotions, feelings and actions. Be grateful under all circumstances, and you can have a happy life.

Such things changes our mind and our atmosphere, this is kingdom building.

Do HDH, teach DP, be a happy couple and stay healthy. These are some key points to become a true and substantial citizen of CIG.

The final solution to bring CIG is to do Tribal Messiahship. You need your tribe to teach you how to love. They will polish you.

The Kingdom will be built in an organic way through the 360 homes in tune with the spirit world, through a natural development.

Material to use is the autobiography, one hour lecture, three hour lecture, etc.

Our Blessings, which today is like a curiosity for the world, will become like a movement. «Are you not blessed yet?» people will ask. It will become a trend.
