Letter to All European Brothers and Sisters from Rev. Young Shik An 'Thank you for making True Mother's Visit to Europe a Great Success'

Young Shik An
May 27, 2015

Dear European Brothers and Sisters,

I am so happy that our precious True Mother could spend these last weeks here in Europe and share so much of True Parents' love with our European Continent. Let us remember and be true to the heart with which she came: *I came with the heart that I will graft the Christian cultural sphere—which has endured the past two thousand years with a heart desperate to meet the returning Messiah as their last ray of hope—to True Parents' true love.*

I personally feel such a positive change in the European Spiritual World and a great confidence that, having celebrated the love and dedication of the last 50 years in the direct company of True Mother and our International President, we have a wonderful opportunity to re-determine ourselves in our mission as European Tribal Messiahs.

True Mother directly encouraged us: *You were able to grow deep roots in this land during the past fifty years. No force can get rid of you anymore. The roots you have grown will remain strong until the day you achieve the hope of Heaven and of humankind - Blessed Families! As of today, a new cultural revolution will appear on this continent. I sincerely hope that you become proud Unification Church Blessed Families that fulfil their responsibilities and hasten the day that all people become one family that attends our Heavenly Parent and True Parents.*

I felt that I must write to express my heartfelt gratitude to each and every one of you for your support in making these 50 Year Celebrations a great success. There were so many aspects and so many blessings shared with Europe by True Parents. In the Celebration in Vienna True Mother presented 90 European representatives (elders, missionaries and young leaders) with awards, and also gave very significant donations to inspire European youth by developing CARP education centres in Albania and France. True Mother and the True Children accompanying her were so inspired by our European young professionals during the Cranes Club Meeting in Vienna and talked about this throughout their stay. We could also receive such sincere and humble guidance from Sun Jin Nim in both Frankfurt and London, and all these events were tied together with love and beauty through the graceful performances of the Little Angels.

As True Mother and her party left Europe for New York last Friday I felt so proud of the way in which you all welcomed and inspired True Parents these last two weeks. You can be certain that True Parents' united heart is overflowing with love and prayers of encouragement for us in Europe. In response, out of our love for our Heavenly Parent and this European Continent, let us dedicate ourselves to realise the cultural-revolution she spoke of, the hope of heaven and humankind - Blessed Families who multiply and realise Cheon Il Guk!

My special thanks go to all who so generously contributed their special donations, which have enabled us to manage the budget well. Any additional donations, from those of you who would still like to offer before the end of May, will be particularly assigned to provide a gratitude donation to True Parents for their never-ending love for our European continent.

Yours sincerely,

Rev. Young Shik An
President FWWPU Europe
