UPF Establish Convention (2005.9.12. New York, U. S. A.)

From the historical point of view, the divisions of our world into East and West, North and South. I am proposing that we build a passage for transit across the Bering Strait that separates the North American and Russian land-masses.

This passage, which I call the "World Peace King Bridge-Tunnel," will link an international highway system that will allow people to travel on land from Africa's Cape of Good Hope to Santiago, Chile, and from London to New York, across the Bering Strait, connecting the world as a single community.

PROJECT

Undersea tunnel between Korea and Japan

The Korea-Japan undersea tunnel will create a huge substantial economic bloc in Northeast Asia, which includes China and Russia by relating with both the Trans-Korean Railway and Trans-Siberian Railway. Also these tunnels will contribute to realizing common prosperity and the permanent peace in Northeast Asia.

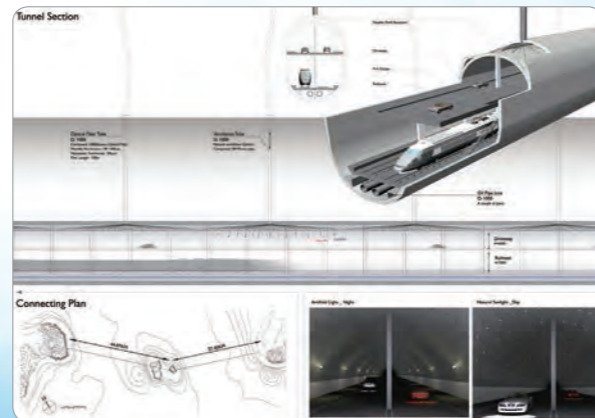

「Offered by the World Peace Tunnel Foundation.」

The Bering Strait Project

The Bering Strait Project promotes communication and harmony by linking the continents which are otherwise not connected. At the same time the Project organizers sincerely desire to realize world peace by enabling the participant countries to have access to the huge (rich) underground resources in Siberia and in Alaska.
