## Happy Mother's Day

A mother's heart is deeper than the ocean and has the capacity to embrace everyone.

Mothers are, and have been, the bedrock of humanity - the first educators, nurturers, and compass of our conscience.

Mothers have quietly sacrifice for their families, their communities and their nation, and upon whose shoulders we stand today!

And don't we need their smile, touch and encouragement throughout our lives!

---

~ To all our Mothers ~

On behalf of WFP Australia's leadership teams, we wish you a joy filled day of love, peace, and happiness as we share the common bond and heart of Motherhood.
