

## Orthodox Bishop of Ecuador and the Divine Principle

Vicente García  
July 22, 2021

My Little History: Nice to meet You ... My name is Mons. Dr. Vicente García and I am the Orthodox Bishop of Ecuador and appointed in Lima Peru, in the Council of the Church as Diplomatic For The United States and I met the brothers of the Unification Church at a meeting in New York. and I always liked the foundation of unifying the family because I was not lucky enough to live in a united family ...

I stayed in the United States where I met good brothers who taught me a Divine Principle and I was studying the whole Philosophy of Unification and I saw important to help many families that are on the verge of breaking up as spouses and before that I already made an Ecumenical community with 35 priests and worked as a missionary in prisons where I saw a lot of injustice and decided to study as a lawyer to help the prisoners and I left the church for a few years to serve my government as Prosecutor of a Province in the jungle of Ecuador and I began to work with the indigenous

people, supporting their communities to prevent crimes against people and I began to give them conferences on the integration of the family with great success. ..

At the moment I continue preparing young leaders for peace. I see here the solution to solve all kinds of violence, crime, corruption, street children, girls with unwanted pregnancies, prostitution, drug addiction, gang alcoholism, etc. etc. ... I use Theological and Legal knowledge based on Science and technology, scientific discoveries. I am writing my book Science without Consciousness ... where my message is opening understanding how our human behavior should be from the individual ... to the general ... an explanation of norms of human conduct to save the family, the society, the nation and the world ... For this reason, I am currently preparing young leaders for peace ...

And my eyes are on young people because they are fresh minds, they have full energy, and they are our relay in the socio-economic development of the country. imagine a young man prepared at this level of knowledge? he would be prepared to have a wife and later children in the same line of education and culture. With all certainty, children with the mentality of true patriots and good social, religious, political leaders who lead the people would come in the future ... more or less a little of everything my brother does ...
