

WFWP Italy's Program, Understanding The Future Risks Of Artificial Intelligence

Elisabetta Nistri
February 2024

Event to help people to understand the risks we can face in the future if we will not be able to guide and control all the future development of A.I.

Elisabetta Nistri president of WFWP Italy opened the conference reporting on the last event that has been held in the Peace Embassy in February, the meeting of Directory Board of WFWP Europe. She reported about the topic that has been discussed and the spirit of cooperation between all the participants. Giuseppe Cali president of UPF South Europe exposed the analysis of History regarding the research for The Spiritual growth and Truth and for the external wellbeing. The result is that now there is an urgent need

taking ownership on the use of AI considering the benefit and risks and of course there is the need of including etic value on it use.

All the guests attended with great interest and shared their ideas and reflections with the desires to follow future events on similar topics
