

## WFWP Italy - The Nature of God and the Original Nature of Man

Elisabetta Nistri  
November 16, 2024

"The Philosophy of Peace of UPF and WFWP: Spiritual Values and Principles" was the framework and the general theme under which UPF Italy and WFWP Italy co-sponsored their first seminar of in-depth study and sharing with a group of peace ambassadors.

14 guests present; among them ministers of faith, university professors, lawyers, psychotherapists and psychologists, all of them connected and supporters of UPF and WFWP initiatives.

In her opening greeting, Elisabetta Nistri, President of WFWP Italy, reported on the recent annual congress of WFWP Europe which took place in Warsaw, Poland and which was attended by more than 100 women leaders from all over Europe, Africa and the Middle East. The meeting addressed important topics concerning women's rights with particular attention to those countries or situations where they are most trampled on, which created great solidarity among all the participants. There were also many messages of hope, resilience and above all proactive interventions that indicated what we can do by working on ourselves to contribute to peace and shared well-being.

This was followed by the greeting and a first presentation of UPF Italy by President Carlo Zonato who illustrated the status of UPF Italy, its mission and its goals, as well as a summary of UPF's founding principles and the projects that have developed in recent years. He explained the objective of the meeting by directly involving the guests to give us their reflections, any questions or suggestions, also in view of the subsequent seminars.

Giuseppe Calì was the main speaker in the two sessions that followed during the morning. Referring to the Unification Thought text, the first session was dedicated to the "Nature of God and the Original Nature of Man" with a propositional analysis that passed transversally from science to religion. the

second session was developed on the theme: "The heart is the origin of everything and also the end, because it is the essence of God and his deepest character." In this second part, the value of the couple and the family as an essential basis for peacebuilding was developed.

The seminar was followed with deep interest and attention by all those present who amply expressed their reflections, questions and suggestions in the afternoon part that followed the lunch, and concretely confirmed their interest in continuing these training experiences.
