

4 Days Divine Principle National Workshop!

January 25th – 28th 2018, Tirana - Albania

Dear brothers and sisters, many greetings from Albania!

During January 25th until 28th, we held 4 days Divine Principle National Workshop in our Training Center outside of Tirana. The theme of this workshop was: “Love God, Love People, Love Nation.” There were 20 people who participated for the first time in such workshop, and among them, 12 people received the wonderful news about True Parents being the Messiah of the Second Advent.

When we take care of others, we can feel so much joy and happiness in our hearts. And this happiness was transmitted to all participants from our lecturers. They were the first who made this workshop colorful, together with the tireless investment of the workshop’s coordinators, MCs, and team leaders. We were so happy and lucky to have with us for one session the Director of our East European Region, Rev. Jack Corley. His words expressed a father’s heart toward his children. We all worked together as one family, sincerely investing for the sake of our younger brothers and sisters.

The feedback of the new guests was very positive. From their reflections we can understand what they feel in their hearts and what they think in their minds.

Here are some of the reflections:

"I did not expect anything less from such workshop. It was a time of a powerful and quick metamorphosis. But above all, it was a painful workshop, so much painful... I could imagine the painful heart of our Heavenly Parent..."

"In this workshop I felt and understood God's heart more than anywhere else. Even though it was so short time, for me this experience will last a lifetime."

"I got so much inspiration from this workshop. I deeply pray to keep this spirit after the workshop as well, and to sincerely invest in fulfilling my goals."

"I faced some feelings and emotions which I never felt before. But, prayer was always my solution. I felt so much unconditional care and love, therefore I didn't give up. This days, opened my heart and made me hear God's voice deep inside me."

"This days have been so far the most important of my life. I got so much inspiration, and I can feel the first steps of my new life."

"I have so much desire to study True Parents' words. Before I wanted to leave Albania, but now I have decided, I will stay and I will help my country to rise up, and I will do my best to end the sufferings of humankind."

"I cannot really understand if my heart is laughing or crying from this indescribable feeling. I cannot believe that during all these years of my life here on earth, I didn't know the meaning of my life and why I came into existence. This first workshop is my first step now, on this earth"
