

WFWP Finland: The Femininity of the Universe and God

Päivi Yoshizumi
January 10, 2026

This program was the first event of WFWP Finland this year, and we wanted to start with looking at the feminine aspect of the universe and God.

Päivi Yoshizumi expressed that the femininity of God and the universe is most clearly expressed in all of us women. There was a power point presentation from the Peace Curriculum slides.

Fatima Usman from AFAES (African and African European Association) encouraged us to have an attitude in this new year to share faith, be courageous to meet new people and help someone in need.

In the end we had a sharing round the table where everyone shared something meaningful for them, from clothes-wearing to events that has had a big influence in one's life.
