

## Message from Prophet Samuel Radebe of South Africa in Korea

Samuel Radebe  
November 5, 2025

As soon as I heard about Mother's situation, I dropped everything and rushed here immediately. That is the truth.

Mother has walked a path of sacrifice filled with tears and blood. All her devotion and sincerity - especially what she poured into Africa - have borne great fruit. I am one of the results of that offering.

Because of that, I left everything behind and came straight to Korea.

There are two kinds of sacrifice: intentional and unintentional. Intentional sacrifice is when you deliberately offer devotion - such as coming at night for a vigil prayer, fasting, and offering conditions with purpose. But there is also an unintentional or natural kind of sacrifice.

That kind of sacrifice is what True Parents have shown - their deep spiritual suffering and offering made not for their own sake, but to pave the way for us to achieve something greater. This unintentional sacrifice of True Parents has become the foundation on which we stand today.

Mother is now walking that very path - one guided by Heaven's providence, not by her own intention. It is a path of sacrifice meant to bring forth something great. A great result, a great victory awaits us.

When I first heard that Mother was unwell, I was very worried. I wanted to talk about her condition, but she stopped me and instead told me she loved Prophet Hadavy. She was not worried about herself, but about me and my family. At that moment, I realized what a true leader she is - a person with no trace of self, living entirely for others and for all humankind.

When I met her, I expected her to be weak, but instead she was burning with passion and full of strength. She looked at me and said, "Go out, Prophet Hadavy. Speak out. Tell the Korean people, the Christian pastors, and everyone the truth."

She said everyone must be "on fire," filled with heat and passion. So I tell you today: may you all burn with that fire. Do not lose strength. Do not be sad - sadness is negative energy and only makes things harder for Mother. You must stay passionate, full of heat and energy - that is positive energy, the power that uplifts Mother. Let us all give strength to her.

In 2026, a revelation came - it will be a year overflowing with such fiery energy. So I hope that all our Unification family members will be overflowing with spiritual strength and passion.

If you ever meet someone Heaven has sent specially, you must take good care of that person - and that is our responsibility toward Mother. We must protect her. If we fail to do so, someone else may take her away.

Mother is deeply concerned about Korea. So I say to you: I send Korea to you - take care of it for Mother. If Korea does not burn with passion for her, we may have to bring her to Africa, where we are waiting for her with that fire of love.

So rise up, pray, shout, and act! Do everything you can. Show Heaven and Mother your devotion. Let us be the ones who express gratitude for the precious gift Heaven has given us - our True Mother.

If we fail, someone else may take her away. But we in Africa are waiting for her. So from today, if you want to contribute to this providence, burn with fire and overflow with energy. This is not a time to be weak - it is a time to be strong, passionate, and full of spirit.

Mother will come out soon. She will return. And when she does, truly great and amazing things will happen.

I did not come here to give a speech - I came to deliver Mother's message. And I have done so. So please, everyone, burn with fire for Mother, so that Heaven's will may be accomplished through her.
