Participant Reflections

"A Shift in Perspective"

"For someone like me who had never heard the word 'Blessing' before, it honestly felt a bit extreme at first. Hearing about being matched naturally triggered some personal hesitation, especially with modern, worldly mindsets. However, through the lectures and testimonies, I realized the profound importance of the Blessing as the path to raising a better next generation and building the Kingdom of Heaven on Earth. Thinking about marriage used to stress me out because I focused heavily on my shortcomings. But today's session helped me see that having doubts and flaws is completely human. What matters most is how we grow, expand our love for others, and fulfill God's Blessing. I learned a great deal!" - Wong Qi Yong (1st Generation, 20 years old)

"Growth and Responsibility"

"Through this workshop, I gained a deeper understanding of Heavenly Parent's dream for every family to become an ideal family centered on His love. I realized that a happy, lasting marriage requires commitment, responsibility, and mutual growth. As a working member, I was reminded that living for the sake of others and taking responsibility for my own life are essential qualities as I prepare myself for the Matching and Blessing." - Tan Chai Xin (1st Generation, 26 years old)

"True Love and Legacy"

"I gained a clearer understanding of the difference between simply liking someone and true love. As children of Heavenly Parent, we are called to inherit the tradition of true love and build marriages centered on Heavenly Parent and True Parents. Moving forward, I want to maintain purity and mature as an individual so that one day I can set a good example for my future children through a life of sacrifice and living for the sake of others." - Jackson Ng Yee Kee (2nd Generation, 20 years old)
