May 29, 2021

From Cheon Jeong Gung to youth at the Heavenly Japan Top Gun Assembly in the FFWPU-Japan National Headquarters Building

Thank you. You indeed are the never-changing green pine trees of Cheon Il Guk and our hope for the future. It is only you, the *hyojeongrang* [heavenly treasures] who can realize the dream of God's only begotten daughter, the True Mother.

I listened, with profound inspiration, to the reports you have prepared. Due to the Fall of the first human ancestors, human history has continued to this day as a history of war, conflict and pain. Therefore, to see the completion of God's providence, it is essential that victorious True Parents emerge from among humankind. Without their emergence, Heavenly Parent's dream and the wish humanity has so longed for, cannot be achieved.

2. Takeuchi Hiroaki, vice-president of FFWPU Heavenly Japan, gave a speech at the Top Gun Assembly - 3. Sang-Il Bang, regional president of heavenly Japan gave a speech at the Top Gun Assembly - 4. Young people provided entertainment

When we look at what is happening around the world, particularly with the COVID-19 pandemic, small and large countries alike have faced more than one year of tremendous difficulties. In such a time, the extreme serious circumstances of our existing environments around the world are making it difficult for humanity to find hope. As a result, young people, who should be growing into future central figures, are committing suicide, losing hope and losing their lives. The world is in a critical state, particularly when it comes to religious and ideological conflicts. At such a time, you within the second- and third-generation realm, born through True Parents, are the only hope.

In Japan until now, you have worked so hard, investing and bringing in tenfold results. This, however,

could not bring about national restoration. Therefore, please invest tenfold, a hundredfold more effort. Let people know that you alone are Japan's hope. Those in the first-generation realm created numerous problems that could not be all solved. You, therefore, must educate and awaken others. Even when it comes to the Korean–Japanese problems, what politicians of the first-generation realm think about comes from their own self-centered interests. This will only be an obstruction in the way toward a world of peace wherein all people live as one large family. Therefore, I hope you raise your voices, educate them and further expand the environment so that people in all fields can work uprightly. Furthermore, the mission of the mother nation is also very important in God's providence.

Until now, mankind has lived for six thousand years like orphans who lost their parents. Their parents are to establish Cheon Il Guk on earth and from the position of having firmly established Cheon Il Guk, their parents are to create the environment in which all people can live with, attend and follow our Heavenly Parent as the eternal parent of humankind. If, however, humankind does not cooperate, or falls back in supporting their parents' work, there is certainly no hope for the future.

All religious groups have steadfastly worked extremely hard for so long in order to meet their parents. From this background, True Parents are seeking to create an environment in which we can all live with, attend and follow the Heavenly Parent as our parent, here on earth. Therefore, please make more effort to ensure you do not become like unfortunate first- and second-generation members, who are not participating in this and missing this golden time. Please solve the Korea–Japan issue.

Leaders around the world are participating in God's providence without even being aware of it. You are hearing reports on activities conducted by righteous people and prophets as well. Living in such a time, please strongly, boldly and courageously raise your voices and reach out to those who are not participating. I am truly happy that with you, I can return gratitude and glory to Heavenly Parent. I love you all.
