July 15, 2016

10th Anniversary of True Parents' Coronation and Entrance Ceremony into the Cheon Jeong Gung

Cheon Jeong Gun

Today is such a historical day in human history. Today is akin to a miracle during the six thousand years of biblical history. Do you realize its significance? If so, how happy do you feel? Happiness does not exist only for oneself.

I know that you heard a report about the providential history that made this kind of result possible from the [FFWPU Korea] president. God created Heaven, Earth, all of Creation, and Adam and Eve. Human beings have a dream. God gave responsibility to humankind, unlike the rest of Creation. God had a dream for humankind. The day we complete our responsibility is the day we become one with God. It will be a day of infinite happiness and honor.

However, humankind couldn't fulfill its responsibility and left God's bosom. Therefore, human history has progressed, not as a world centered on God, but as a fallen, suffering world centered on Satan. Nevertheless, God, who is an omniscient and omnipotent being, cannot fail. There is no such word for God. Thereby, God has been doing providential work, no matter the hardships and challenges.

Central figures had to fulfill their responsibility throughout the providence. How hard must it have been for God? God selected the chosen people of Israel for the dream of having the only begotten son and daughter. This dream finally manifested through the people of Israel when Mary, who had a substantial responsibility, gave birth to Jesus Christ as the only begotten son.

How happy was God in that moment? There were so many people in the fallen world. However, there was now one person that God could directly subjugate and call a son. Then, what kind of responsibility was left for Mary at the moment? In the end, Mary could not fulfill her responsibility.

Mary is not some holy mother, or any other position like that. Some churches have praised her for 2000 years as an amazing holy mother. In the end, she could not fulfill her mission of creating the environment for Jesus Christ, and he was crucified. Unfortunately, God had to work through ignorant people and complete the providence through these ignorant people. It is a sad story.

If Jesus was able to meet the only begotten daughter and have a holy marriage, then what would have happened? He wouldn't had been sent to the cross and he wouldn't have said that he would return to hold the supper banquet of the lamb. If he had achieved complete victory over the history of the providence of indemnity and then completed the heavenly kingdom on earth, then Heavenly Parent could have dwelled

with us directly. But the Jewish people, Mary, and the family of priests could not prepare the proper conditions.

That is why heaven's mission was to find the only begotten daughter during the 2000 years of Christianity. Heaven would not reuse any individual or nation once they'd failed their mission. That is why the providence came to Asia.

I can't explain all the providential history within such a short time. You have to know that Korea is the chosen people that Heaven raised after 2000 years. There were central figures as well. The only begotten son and daughter were born to this country.

Ladies and gentlemen, in 2001 the Coronation Ceremony for God's Kingship was held. Where was it held? It was held at the training center. At that time, True Parents were in South America offering conditions for the world providence. At that time, did the people in charge of providential organization or in other high positions build the training center? A providential moment was approaching us but no one noticed except for one person on this earth. That is Dae Mo Nim, who fulfilled the providence representing all of you. Therefore we should be thankful to her.

That is the time that True Parents allowed Blessed Central Families to pray in their own names. Not in True Parents name, not in the name of Jesus Christ. It is a great blessing. Do you know that? It means that True Parents and heaven acknowledged each and every single Blessed family as their children. How amazing a blessing is that? Even though you weren't perfectly prepared for it.

By doing that, True Father made one final request: keep the purity of your lineage. Don't infringe upon people's heart. Don't abuse public money. Don't take public money. These are not easy things. Have you obeyed these words? There would be only a few people who can say yes with confidence. Six years later, who built the Cheon Jeong Gung when we had the Coronation and Entrance Ceremony? Did you build this? All the buildings in the Cheon Won complex were built and supervised by the spiritual world.

Dae Mo Nim gave birth to the only begotten daughter, unlike the situation during Jesus Christ's time. She lived her whole life for Heaven's providence. She knew God better than anyone else! She knew how to prepare the environment for True Parents. Therefore, she accomplished the work that no one else could even think of. She called representatives from the spiritual world. However, it is hard to focus 100 percent for the public while in this satanic world. It is hard for people of the fallen world to ignore their private benefit.

You have a general idea what I am talking about. Dae Mo Nim created this environment through working and believing in God.

Think about it. Where would we have had the Coronation and Entrance Ceremony if the Cheon Jeong Gung had not been built yet? Should we have had this ceremony under a tent? That was the day six thousand years of providential history was completed. The two thousand years of Christianity had no

content, but their external culture still flourished throughout Europe. The Catholic churches still remain in several places, even after being built 700-800 years ago. None of those place even had an owner. We have to leave our trace in the providential history of True Parents. There are no senior leaders prepared for that.

We are in this era; you have to repent. Even if you worked with True Parents, you have to reflect, “Did I work hard and fulfill my responsibility? Am I in the position of a filial child? Am I loyal?” We should reflect on ourselves.

I think there will be rain today. I heard that. You should cry your hearts out and ask forgiveness and be really grateful that you and your family can be here on this day.

Later on, become mature children. You have to fulfill your responsibility. There is no one here who can criticize others and say whether they are good or bad. Only I can do that.

I know that all the continental presidents are gathered here because of the meeting with the Special Mission Commissioners. I would like to praise all your hard work and say I am proud of your work in front of the people here. However, we can't compare it with the heavenly blessing we've received. Especially, the blessing given when True Parents combined soil and water from all around the world and gave it out on the Coronation and Entrance Ceremony. What was the meaning of that? Originally, this earth was under God's ownership. It was under God's sovereignty. But because of the Fall, this world became satanic and individualistic. You know the meaning of this and you heard that you have to change over your ownership. Even if you think you own things, the reality is that they are not yours. Understand? Be the filial and loyal, those who expand Heaven's ownership. Are you doing this? Can I believe that?

There is the present matter at hand when we are heading toward vision 2020. Depending on how you can fulfill your responsibility, God's status will change. True Parents' status will change. Externally, unsolvable problems are occurring all around the world. Religious problems brought such a big tragedy in France. There are these kinds of problems everywhere around the world. Not just that, the planet itself has contracted a deadly fever because of global warming. We don't know what is going to happen next in this anxious situation. Should we just stand aside and watch from the sidelines? What should we do?

True Father started the Scientist Assembly in New York in 1972 for the sake of the world providence. He asked all the recipients of Nobel prizes and those with reputations as thought leaders to talk about absolute value. The Scientist Assembly gathered a total of 21 times. During that time, True Father went to Danbury prison.

During that time, the chairperson of the Scientist Assembly was Dr. Kaplan. True Father asked him to announce that communism would perish. It was a challenge. In 1985, the embassy for the Soviet Union was next to the Intercontinental Hotel in Geneva Switzerland. All the scholars gathered in that hotel, right next to the Soviet Embassy. There, Dr. Kaplan announced that communism would perish. A few years later, communism fell.

At that time, the United State was in danger. South America was in danger. People thought that communism had taken over the world. During that time, True Father saved Nicaragua in South America from inside of Danbury Prison.

If people around the world know the way True Parents work, they will be blurred with tears. Despite this very difficult path that True Parents had to go through to accomplish God's Will, True Parents just looked forward and marched on. Today you stand here in this place, but there is a history of challenges that had to be overcome in order to be here that you cannot begin to understand. So many things that you cannot even imagine have happened. However, True Parents were able to create this miracle that you see here today with the strong heart of working in oneness with God and to accomplish God's desire.

You have your own responsibility. However, you could not fulfill it. If there is one thing that I would like to ask of you today, and that is that from today, I want you to work together with me to establish this Cheon Ji Seon Ha Gwon!
