

## There will be no conflict in the future

Sun Myung Moon  
November 24, 1991

Until now Koreans have never even once invaded a foreign land. The Korean people are a race who have deep affection and love for humanity. From this point of view, I can say that the Korean people are close to the realm of God's heart because they have sacrificed more than any other people.

The highest things in the world, the highest and most precious things in the world of fallen humanity are the True Parents and the right of the first son. Next come the rights and responsibilities of parents, and then comes right of kingship. This is an exclusive authority. God has been active in Korean history order to secure the authority of the first son who inherits the heavenly kingship. It is the same with Japan. It is the right of the first son to carry on for the emperor in the final days. The first son has to become a true parent. Adam was the original first son of humankind. Thus, the right of the first son must necessarily connect with the position of a true parent, and the realm of the first son must be restored. Otherwise, he will be unable to stand in the position of a true parent.

I returned from Russia and proclaimed the True Parents. The proclamation of True Parents! After restoring the right of the first son, True Parents must stand on the world level. Having gone beyond the nation to the world, based on how circumstances expand, that leads to tribal kingship and national kingship for True Parents. Thus, when True Parents succeed on the national level, true kingship will begin. When North and South Korea are united, the true kingship will begin.

The kingship that proceeds from God will be established. That is why the nation where such a kingship is formed will have the three main components of a nation: sovereignty, territory, and citizenry. Without sovereignty, territory, and citizenry, kingship cannot be established. I am now calling for global citizens. We now have sovereignty, but lack people and territory. Consequently, a citizen that brings unification to North and South Korea, as a citizen of heaven and earth, should go on to establish kingship in alignment with the Unification Church.

In the future there will be no conflict. The struggles until this time have been self-centered and pointless. They were struggles to take something from someone else. A unified world, on the other hand, is a world where God's kingship is established and where people live for the sake of others. Then there is no need for war. There is no need for brothers to deprive each other of their possessions. Instead they may run away because the other is trying to give too much to them! That is why, if you live unselfishly in your town, everything will be offered to you. You can receive a room in that town. With the utmost devotion people will prepare breakfast, lunch and dinner for you. You will be able to sleep there on your way. Such an age is coming.

In the future, the separation of the three powers will not be needed. Laws and everything else will disappear. When the autonomous realm of love is fully established, the law will automatically be fulfilled. In the place where living for others is realized, no problems arise: upper and lower, front and back, and left and right are one.
